BLAIRMORE ALBERTA

OLD-TIME PRINTER OBSERVES ANNIVERSARY

The News has received a birthday card from J. Peck McSwain, one of the best-known of the old-time printers of the northwest.

Many years of his career were spent in the State of Washington, where he became acquainted with the late publisher of this paper, A. Z. Jessup. Early in the century he came to Alberta, but finally settled at Stewart, British Columbia.

J. Peck's card reads: "J. Peck McSwain—His '3' Mark—(Made in Canada), 1868—Aug. 26, 1938. Seventy-three today. Hiking along life's porphyry dyke with a fatful of sandwiches and a bottle of Canada's best brew."—Nanton News.

A Missouri editor recently received a letter from a subscriber, enclosing a check for renewal of subscription, and a statement that he did not charge enough for the paper. Hospital authorities report the editor will be as good as new in a few days.

PASS SCHOOL STAFFS

The following comprise the staff of the Blairmore school for the fall term: Principal, Donald MacPherson; vice-principal, R. Racette; Mr. Sidney White, Miss Geraldine Frey, Miss Sarah McVey, Miss Helen Dutil, Mr. W. Jallep, Miss Lydia Brunetto, Mrs. C. Fleming, Miss Alice Soulet, Miss Anna Kubik, Miss Alice Hamilton, Miss Lena Fraser and Miss Ethel Cartwright—14 rooms.

Following comprise the staff of the Bellevue schools: Principal, W. D. McEachern; vice-principal, W. Macrolin; second vice-principal, Luther Goodwin; principal Maple Leaf ward, P. Turner; T. Schmiedl, B. Goodwin, J. Morris, G. Clayton, Misses I. Pennan, E. Price, E. Chiaravano and E. MacDonald—12 rooms.

Coleman staff: Principal, D. Hoyle; vice-principal, H. Allan; J. McDonald, S. Ondrus, R. Spillers, J. Cousins; Misses A. Yell, M. E. Dunlop, E. Wilson, M. Allen, M. Jones, L. Johnston, E. Hayson, K. Milley, E. Dunlop, Mrs. M. Clifford, and Mrs. G. Thompson—19 rooms.

Frank school: W. R. Drake, principal, and Miss Frances Tompkins.

Principles of British justice apparently do not apply to this government in its dealing with its servants. Mr. Gibson was dismissed without a word of warning from a position of great importance in this province. He was given no opportunity of knowing what fault had been found with his work, and the man who dismissed him declined to see him. Many other valuable public servants have been thrown out by this government in the last three years, and the cost to the people of this province through these spiteful dismissals will run high. A more serious implication is that the views of a police magistrate must coincide with those of the government of the day if he is to retain his position. —Bed Deer Advocate.

CZECHO-SLOVAKIANS TO CELEBRATE IN BLAIRMORE

An event of more than ordinary interest at the present time, since a cloud of war hovers over their native land, will be the gathering together of Czecho-Slovakian people from the Crows' Nest Pass towns and south-eastern British Columbia to celebrate the 20th anniversary of the founding of their country as a republic under the late President Masaryk, following the Great War.

At this gathering in Blairmore on Labor Day, prominent officials of the First Catholic Slovak Benefit Society of Canada will deliver addresses at the arena, to be followed by a programme of choruses, dances, songs, etc., in national costumes.

Assembling at the school grounds at 2 p.m., headed by the West Canadian Colliers' band, the procession will proceed to the arena. The programme will end with a grand dance at night.

Officers of the Canadian association, whose headquarters are in the Crows' Nest Pass, are: Steve Siska, Coleman, president; John Lapnicka, Hilcrest, vice-president; Louis Bubnick, Coleman, secretary, and Steve Leasky, Coleman, treasurer.

Vincent Ruzicka, of Frank; George Kleasen, of Bellevue, and John Danco, of Blairmore, will be among the speakers, the latter acting as chairman.

EITHER PLEASES OR AGGRAVATES

With completion of the first 10-year lap of its existence, the Athabasca Echo says editorially that for 320 weeks it has never failed to please or aggravate its readers. Publisher Conquest, who started the newspaper at 330-400, in the same 100 miles north of Edmonton in the days of high-priced wheat, recalls the depth of the depression when farmers heroically stuck to their wheat. "How we lived and paid our way through that period is as mysterious as how our farmers pulled through," says the Echo editor, expressing faith that the next ten years will justify his optimism.

GOOD ADVICE

There is a newspaper in Kansas whose motto is "lie, steal, drink and swear," and it is thus explained by the editor: "When you lie, let it be down to pleasant dreams; when you steal, let it be away from immoral associations; when you drink, let it be water; when you swear, let it be that you will patronize your home paper, and pay your subscription when it is due." Good advice.

An editor of one of our exchanges says that he and his wife disagree materially. She reads what others write; and he writes what others read. She keeps the devil out of the house to the best of her ability, while he detains him on all occasions and could not go to press without him. She knows more things than he writes, and he writes more things than she knows.

To celebrate Labor Day, various functions are being staged at all points between Cranbrook and Lethbridge. At Cranbrook the big 40-year anniversary will be going full swing; at Fernie sports and dance; at Natal sports and dances; at Coleman dances and carnival; at Blairmore sports, dances, etc.; at Frank a dance; at Bellevue flower show, sports and dances; at Lundbreck a dance, and what not. It is hardly possible for any individual to attend all, but we recall only a few short years ago Capt. W. A. Beebe could boast of attending five or six dance functions in one night, and though now reaching for the 92nd mile-post, he states he'd like to do the same again.

LOCAL AND GENERAL ITEMS

That brief should ensure another year's fat salaries.

H. A. (Sandy) Ferguson left Tuesday for Enchant, where he has accepted a position as teacher.

Saskatchewan people realize the power of the press, for the press had a whole lot to do with kicking Aberhart and his gang out.

Before leaving for Prince Rupert, John Aschbacher arranged to have all surplus frogs and toads of the Crows' Nest Pass district shipped to him.

Hon. T. D. Pattullo, premier of our neighbor province of British Columbia, condescended to accept an invitation as honor guest of the Canadian Weekly Newspapers Association at Vancouver.

Mrs. S. G. Bannan, Robert and Shirley, accompanied by Mrs. Bannan's mother, Mrs. MacDougall, left Sunday by motor for Spokane, going via the Logan Pass highway. They will return by the west route this week end.

Mr. and Mrs. Angus J. Morrison had as their guests at Calgary during the week end the latter's sister, Miss Madge Mooney, of Winnipeg, who had spent the past year in Australia and New Zealand, and is now returning home.

Mr. Floyd Hottle returned last week end from a holiday trip to the coast. Remaining over for a few days with friends, he continued on to Calgary on Wednesday, accompanied by Mrs. Hottle and daughter, who had been visiting Mrs. Hottle's parents here. Mr. and Mrs. T. J. Williams.

R. Sjobeck, who for several years has been postmaster on this division of the C.P.R., has been obliged, owing to his health, to retire, and will shortly return to his home in Sweden. He completed his service here the early part of the week. His successor has not as yet been announced.

Wonder where's the money coming from to finance the Social Credit organizing campaign being conducted in the eastern provinces by Mrs. Rogers, M.L.A., and others from Alberta? It surely is not coming out of their own pockets any more than Aberhart would endeavor to finance his own. Anyway, it's a lovely holiday idea.

William L. "Bill" Mitchell, one of the best known guides in the Rockies, was drowned in the Bow River west of Banff on Saturday when his canoe upset. He was 65 years of age. Edgar Davey, his companion, succeeded in reaching shore, but was unable to render assistance to Bill.

Too bad that John Aschbacher is leaving Alberta at this time. Had he remained another fifty years he may have seen a dividend.

Following up parties heading for Len Davis dance at the Willow Creek picnic grounds, west of Staveland, last week, about thirty persons were hailed before court on various charges under the liquor and motor vehicle acts. As a result 27 convictions were registered, the fines running from \$10 and upwards each with costs. It was a happy party, particularly when some of the young ladies had to arrange means of returning home.

Canada must proceed actively with the mechanization of her coal mines to as great a degree as possible if she wishes to retain the markets she has developed, let alone seek to enlarge her sphere of distribution, in the view expressed by T. L. McCall, coal mining engineer with the Dominion Steel & Coal Corporation, in a recent address before the mining society of Nova Scotia. Citing the case of the motor car industry, he felt there is no grounds for the fear that mechanization would reduce employment.

BLAIRMORE HOMING PIGEON RACE

The fourth race for young birds was flown from Wetaskiwin, 236 miles airline, on Sunday last. They were liberated at 7 a.m. and were clocked in as follows:

First, John Hurkat, 3-01.07 p.m.
Second, Martin Biegan, 3-10 p.m.
This was the final young birds' race this season for Blairmore. Next year it is hoped to fly them up to 600 miles.

Prizes for this last race were donated by T. Duncan, Greenhill hotel, and L. L. Morgan, of the Crows' Nest Pass Motors.

Thanks are extended to those donating prizes, also to the press for publicity.

1938 CANADA YEAR BOOK IS OFF PRESS

The publication of the 1938 edition of the Canada Year Book, published by authorization of the Hon. W. D. Euler, minister of trade and commerce, is announced by the Dominion bureau of statistics. The Canada Year Book is the official statistical annual of the country and contains a thoroughly up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, its demography, the different branches of production, trade, transportation, finance, education, etc.—in brief, a comprehensive study within the limits of a single volume of the social and economic condition of the Dominion. This new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to the date of going to press.

The 1938 Canada Year Book exceeds to almost 1,200 pages, dealing with all phases of the national life and more especially with those susceptible of statistical measurement. A statistical summary of the progress of Canada is included in the introductory matter. This gives a picture in figures of the remarkable progress which the country has made since the first census of the Dominion was taken in 1871, sixty-seven years ago.

AN HONEST MAN

A preacher at the close of one of his sermons said: "Let all in the house who are paying their debts stand up."

Presently every man, woman and child, with one exception, rose to their feet.

The preacher seated them, and said "Now, let every man not paying his debts stand up." The exception, a careworn individual, clothed in last summer's suit, slowly assumed a perpendicular position.

"How is it, my friend," asked the minister, "that you are the only one not able to meet his obligations?" "I run a newspaper," he answered, meekly, "and the brethren here who stood up are my subscribers, and—" —Ex.

In the Drumheller district it is reported larger crowds presented themselves at dance halls than at other places where arrangements had been made to hear Mr. Aberhart's "Democracy" broadcast.

Reduction of gasoline prices in British Columbia is forecast. Through the appointment of a new director of fuel and other legislation, a cut in price is in sight. The action of the coast province is expected to be reflected in Alberta, where the Alberta Motor Association has been urging the need of lower fuel prices to motorists. Protest against prevailing prices were made in the legislature at the last session, and an investigation by the government was requested.

Pastor, Rev. C. Helen Mooshian, B.A.; assistant and organist, Gunnell Berglund. Sunday services—

Sunday school at 11 a.m.

Morning worship at 12 noon.

Evangelistic service at 7.30 p.m.

Tuesdays, 7.30 p.m., Prayer Meeting.

Fridays, 7.30 p.m., Bible Study.

Strangers and visitors always welcome.

Aberhart talks a lot about "distorted minds." Well, he probably never knew what they were till he started to mix with them at Edmonton.

Following is the assignment of former Pass teachers in Calgary schools for the opening of the fall term: Miss C. L. Williams, B.A., Alexandra school; Miss W. B. Williams, King Edward; Miss Blanche Douglas, McDougall; Miss Vivian Keith, principal Parkhill; Miss E. M. Fulton, Sunny-side Bungalow; Miss M. T. Davis, B.A., Balmoral Junior High; J. W. Verge, principal Langview Junior High; R. G. Powell, B.A., Western Canada High, and C. V. Asselstine, Crescent Heights High.

Instead of celebrating Aberhart's "Democracy day," Staveland staged a "Resurrection day" successfully. On that great day—Saturday, August 20—the bodies of several Chinamen were exhumed to be placed in what was supposed to be more comfortable soil in their native land. The bones were raked up and packed in sacks for shipment. The bones of two celestials filled three dishpans. They had been washed carefully, and teeth were thoroughly cleaned with a toothbrush. Gold teeth were extracted and replaced with some tooth-like ingredient. Hundreds of people turned out to see the performance, but a ban was placed on the use of cameras.

A Visit Of Significance

While the distinguished visitor had little to say publicly as to the purpose of his visit and nothing of what the outcome might portend, the surprise visit of Marshall Sir Edward Ellington of London, England, an emissary of the Royal Air Force, to the Turner Valley oil field in Alberta recently may have results of far-reaching importance, not only to the producers of crude oil themselves but to the entire Western country.

If representations made to Sir Edward by Turner Valley producers of crude oil come to fruition, the time is perhaps not far distant when highly refined gasoline suitable for the exacting purposes of aviation may be shipped to Great Britain or elsewhere for storage in considerable quantities, with the Royal Air Force as consumer and consignee. This, at any rate, is the hope of producers who are of the opinion that Alberta crude, when properly processed, is eminently suitable for such a purpose because of its high octane content, an opinion which was endorsed by Sir Edward himself.

If the claims of the producers as to suitability of the product can be substantiated to the satisfaction of the British authorities it is quite within the realm of possibility that a new market for what is now a surplus commodity will be opened up as a result of Sir Edward Ellington's visit and investigations.

Not So Very Surprising

Although Sir Edward's visit was a surprise to the extent that presumably no one in the prairie provinces had any advance intimation of it, it is not after all very surprising that the British authorities should be taking some cognizance of, and interest in, the output and potentialities of the Turner Valley oil field.

As a producer of crude of high quality with great potential capacity, the Turner Valley field is longer in the experimental stage. Sufficient of its output has been marketed and sufficient tests have been made to demonstrate beyond any doubt that it is a reservoir of great extent and great capacity; indeed claims have been made without contradiction that it is one of the largest, if not the largest, in the British Empire.

Under these circumstances and with the consumption of gasoline by the Royal Air Force growing by leaps and bounds as Britain strengthens her aerial arm of defence against aggression from outside with the greatest possible speed, it should not occasion any great surprise if those in charge of the Empire's defence should include a field of this magnitude in their survey of all available supplies of a commodity for which there is an increasing demand in times of peace and of which ample and safe supplies in the event of war, would be a vital necessity.

Would Solve Problems

It is certain that if contracts could be entered into with the British government, or some concern acting on behalf of the British government, for the supply of substantial quantities of either the crude oil or the refined product from the Turner Valley field, it will go some way towards solving the producers' vexed problem of finding sufficient markets to absorb the rapid increase in available surplus of Alberta petroleum.

The prospect, at least, opens up a wide vista of speculation. There is the possibility, for instance, that the British government might regard the Alberta oil pool of sufficient potential, if not immediate, value, to be willing to subsidize the construction of a pipeline to the head of the Great Lakes or to Churchill on the Hudson's Bay, to ensure the availability of a supply source in the event of other sources being shut off.

Either project would be of great value to Great Britain in an emergency and the former particularly would be an additional asset to the producers in marketing their surplus oil for commercial use in Eastern Canada. A subsidized pipeline to the head of the Great Lakes would undoubtedly enable Alberta oil to compete on an economic basis with Mid-Continent oil in the eastern markets.

Then, too, the great strides being made in development of aviation in Canada, both military and commercial, betokens a permanently widening market for Alberta crude in the west with the prospect of an increasing market in the east. The cost of transporting the oil to the east on the railroads is unwelcome or unable to grant further concessions in carrying charges.

Should Be Pressed Home

Certainly these prospects and possibilities are worthy of serious investigation and it is to be presumed that the producers themselves will not let an opportunity slip to press their claims for consideration with the greatest possible vigor.

Any outlet which will enable Alberta oil producers to market their product to full capacity of the wells should be of material benefit, not only to the oil industry itself but to all other industries with which it has been linked, not excluding agriculture. It should have the effect of cheapening the product to the consumer in the prairie provinces, and the associated industries which a flourishing oil industry might be expected to foster should afford an expanding outlet for agricultural products.

No Use For Revolvers

Law-Abiding Canadian Citizens Do Not Carry Them

The average law-abiding citizen of Canada would no more carry a revolver in his hip pocket than a stick of dynamite. It simply does not occur to him that when he goes touring he should carry such a weapon in the pocket of his car. Far too many revolvers are privately owned, but great numbers of them are war souvenirs, probably not discharged in many years. The situation in the United States is quite different. Any proposal there for real control of revolvers and pistols arouses resentment and strong opposition. In most States it is lawful for men to carry revolvers, and a common practice in Ottawa Journal.

Heating Power Of Sun

The sun exerts tremendous heating power on the earth. One acre of the earth's surface receives heat equivalent in power to 250 tons of the best anthracite coal in a three-month period. No less than seven tons of sunlight fall on the earth every hour at a speed of 186,000 miles per second.

A new British process to keep wool from shrinking is gaining wide interest among textile manufacturers in England.

THE FAMOUS RUBBING LINIMENT

Put on—pain goes. Rub on—pain goes. Put on—pain goes. Rub on—pain goes. Put on—pain goes. Rub on—pain goes.

MINARD'S LINIMENT
"KING OF PAIN"

A Perfect Specimen

Is What? Physiologist Calls Boy Raised On Meatless Diet

The magnificent health of a British lad whose vegetarian parents restricted him to a meatless diet has led one of Great Britain's foremost physiologists to believe he has located the "most perfect boy". Sir Leonard Hill, director of research at St. John College and Institute of Physical Medicine, wrote in the British Medical Journal of the youth whose father and mother retired years ago to the vegetable patch.

He did not identify the nine-year-old boy who weighs 59 pounds and stands four feet four.

The perfect specimen doesn't eat meat, fish, eggs or bread, walks 10 miles daily before breakfast, then sits down to one slice of pineapple. For lunch he has baked spinach and onion. He explained to curious airport attendants who saw him and his Negro cook loading a collection of air-olins, prime ribs, and 40 pounds of lamb chops into the ship, that he had sampled the meat from his favorite butcher at Miami when he was in port on his yacht recently, and decided he had to have some more. The bill came to \$125.

"I couldn't buy them any place else," he said, and headed back to Georgetown after a two-hour wait.

Was Honest Anyway

One hot July day in 1932, a man was fined \$10 for being drunk in Woodstock, Ont., but could not pay the full fine. He could only manage \$9.95. So the police chief paid the missing nickel, just to keep the books straight. A short time ago the man returned, and solemnly handed the chief the five-cent deficit.

The Maharajah of Kashmir, India, has an annual income of \$10,000,000 from his personal estate.

May Not Pass Test

Inventor Of Ice Cream Vegetables

Thinks He Has Something

Philip Winger of Irvington, New Jersey, insists his invention is ice cream, but whether the public will say it's spinach and the heck with it remains to be tested. Wenger, an ice cream maker, announced his tomato sherbert and said other vegetable flavors, including lima bean, green pea and spinach, would follow soon.

Because they gave bread to the starving mob at Versailles on Oct. 6, 1789, Louis XVI. and Marie Antoinette, of France, were popularly named "The Baker" and "The Baker's Wife."

"HOOK UP WITH OGDEN'S"

Get a line on this mild, mellow cigarette tobacco and you'll find a lot of extra satisfaction in rolling your own. No need to fish around for better Fine Cut than OGDEN'S—there is none. OGDEN'S rolls richer, cooler and smoother every time—especially when you use the pick of the papers—"Chantrelle" or "Vogue".

Both From Same Ship

Latrine Bell Struck Twice When Bar Of Gold Recovered

At eighteen minutes past ten on a recent Friday morning, states the London Times, the "Latrine Bell" at Lloyd's was struck twice; and in the sudden silence the Caller announced that a bar of gold had been recovered from the Latrine.

Bell and bar both come from the same ship. That, it is true, is only a coincidence; but it adds to the thrill of a moment which even purports in language might be induced to call dramatic. The bell was recovered in 1859; and for now nearly 80 years it has hung in the centre of the Underwriting Room at Lloyd's, where it is struck to call attention for important news, once for bad news and twice for good.

The bar was recovered on Friday. But the bell had been at the bottom of the sea for 60 years when it was recovered, and the bar had been at the bottom of the sea for one hundred and thirty-nine years before the bell was struck to announce its recovery.

THEY ALL ADVERTISE

By Ellis Hayes

A hen is not supposed to have Much common sense or tact. Yet every time she lays an egg She exclaims forth the fact. A rooster hasn't got a lot Of intellect to show. But not the least most roosters have Enough good sense to crow. The mule, the most despised of beasts, Has a persistent way Of letting folks know he's around. By his insistent bray. The busy little bees they buzz, Bulls bellow and cows moo. The watchdogs bark, the ganders quack. And doves and pigeons coo. The peacock spreads his tail and squawks. Pigs squeal, and robins sing. And even serpents know enough To hiss before they sting. But man, the greatest masterpiece That nature could devise, Will often stop and hesitate BEFORE HELL ADVERTISE.

Meat Cost Plenty

Wealthy Man Flew 600 Miles To Get What He Wanted

Walker P. Imman, wealthy sportsman, flew to Miami, Fla., in his private plane from his plantation at Georgetown, S.C., recently, just to buy some steaks and lamb chops—a 600-mile journey that cost \$83.04 for gasoline alone.

He explained to curious airport attendants who saw him and his Negro cook loading a collection of air-olins, prime ribs, and 40 pounds of lamb chops into the ship, that he had sampled the meat from his favorite butcher at Miami when he was in port on his yacht recently, and decided he had to have some more. The bill came to \$125.

"I couldn't buy them any place else," he said, and headed back to Georgetown after a two-hour wait.

Was Honest Anyway

One hot July day in 1932, a man was fined \$10 for being drunk in Woodstock, Ont., but could not pay the full fine. He could only manage \$9.95. So the police chief paid the missing nickel, just to keep the books straight. A short time ago the man returned, and solemnly handed the chief the five-cent deficit.

Growing In Importance

Turkey Now Centre Of Imposing Ring Of Alliances

Turkey has become a vital factor in Europe's negotiations for preserving peace and preparations for possible war.

"The Sick Man of Europe"—as the old Ottoman Empire was known—is the centre of an imposing ring of alliances and, spending 60 per cent. of income on rearmament, is sick no more.

Turkey has defensive alliances and non-aggression pacts extending from Mid-Asia to Mid-Europe, many arranged by Kemal Ataturk, dictator-president for 15 years.

With Turkey as leader, the little but well-armed states of the Balkan Entente—Yugoslavia, Greece, Rumania and Turkey—and Bulgaria, which again is on friendly terms with it, can put 10,000,000 soldiers in the field.

For many years Turkey has had a friendship alliance with Soviet Russia and she is a signatory of the Saadabad (Asiatic) pact with Iraq, Iran and Afghanistan.

Of increasing importance are her increasingly cordial relations with Great Britain and France, the powerful democracies of western Europe, in contrast with her pre-war ties with Imperial Germany.

Britain recently granted Turkey £16,000,000 (\$80,000,000) in a loan and credits, of which £6,000,000 (\$30,000,000) probably will be used for munitions and warships. Concessions from France in the shape of the Sanjak (state) of Alexandretta question helped bring Turkey into line with the democracies to oppose the activity of the Rome-Berlin axis in the Balkans.

Some of the British credits, Turkey expects to use to buy heavy artillery guns for both banks of the Dardanelles and the Bosphorus, which she is re-fortifying rapidly in order to make those vital passages between the Black Sea and the Mediterranean invulnerable.

Many Kinds Of Bread

Traveler Found 100 Varieties In Thirty Countries Visited

Romance in the story of bread was found by A. C. Williams, Toronto globe-trotter, who in the world tour from which he returned recently found in the 30 countries visited some 100 varieties of bread. He unearthed many strange methods of preparing and baking it. Mr. Williams was sent by the Long Foundation of Food Research, under the sponsorship of the Museum of Science and Industry Rockefeller Foundation, New York.

Egyptian women travelling with their caravans are able to bake bread on the backs of their camels, he explained. Three women take part in the process. The first one has a small mill on the back of a camel and grinds the grain into flour. She passes this on to the second woman who works it into dough, while the third woman has a brazier of coals and bakes the flat loaves for these desert travellers.

Egyptian women also bake bread by leaving dough on a roof under the sun for four days, he continued. He told of herders on the Horthagy Plains, Hungary, who exist on bread for periods of ten days while herding. At the end of this ten-day period their wives bake fresh loaves, and carry them to their husbands.

Bread is a symbol in some countries and at a wedding in Czechoslovakia which he attended the bride walked through the streets with a basket of bread, which she distributed to people she met. This gesture was symbolic of the hope that the bride would never want for bread.

Bread is a symbol in some countries and at a wedding in Czechoslovakia which he attended the bride walked through the streets with a basket of bread, which she distributed to people she met. This gesture was symbolic of the hope that the bride would never want for bread.

Question Answered

The Duke of Devonshire was once asked by a rather ostentatious contemporary why he invariably traveled third class, considering he was reputed to be such a rich man, as well as of the so-called "cream" of British nobility.

"Simply because there happens to be no fourth," was the swift reply.

Quick Service Record

A new record was set up through the Royal visit to France. Paris telephonists connected the Queen with London in 16 seconds one day. Her Majesty telephoned every morning to the Princesses before official ceremonies began and there was every effort to put the call through swiftly.

Pittsburgh gasoline service station has taken on some girl attendants. The proprietor says the idea will spread, but that depends on the number of smiles to the gallon.

Mussolini has ordered all government civilian employees to wear uniforms henceforth in working hours.

Midget Sun Is Powerful

Electric Light So Hot It Has To Be Water-Cooled

A brilliant new electric light, in which a midget sun, one-fifth as bright as the real sun, shines through a miniature Niagara Falls, has been announced.

The light itself is no bigger than a pin-head but it is so hot it would destroy itself were it not constantly cooled by a waterfall which pours three quarts of water over it every minute.

The "sun" and the "Niagara" together are small enough to be housed in a glass tube the size of a shotgun cartridge.

The lamp, developed in the General Electric Company laboratories at Nela Park, Cleveland, produces 1,000 watts from a mercury arc. It consists of two glass tubes, one within the other. The small tube is of quartz. Within it is the midget sun—a globe of mercury and a trace of argon gas. Between this quartz tube, about as big as a cigarette, and the other glass case flows the waterfall.

Although the water absorbs 90 per cent. of the heat generated, it allows virtually all the ultra-violet rays of the light to pass through. This gives the new lamp promising therapeutic possibilities.

Even greater value for the lamp was seen in photo-engraving processes, because, General Electric engineers said, the mercury arc "can neither wander nor wiggle." This steadiness makes possible engravings with "an almost perfect screen, each dot of which when viewed under the microscope, appears astonishingly clear cut."

SELECTED RECIPES

MUFFINS

1 1/2 cups pastry flour
1/2 cup St. Lawrence or Durham Corn Starch
3/4 teaspoon baking powder
1/2 teaspoon salt
3 tablespoons sugar
1 cup milk
1 egg well beaten
3 tablespoons melted butter

Mix and stir dry ingredients. Add milk to beaten egg. Make a well in the flour and pour in liquids. Combine and stir. Beat lightly. Pour into well buttered muffin tins. Bake at about 350 to 400 degrees F. approximately 20 minutes. For variety add 1/2 cup chopped bacon, or 1/4 cup grated dry cheese, or 1/4 cup raisins or dates with a little spice if liked, or blueberries.

RAISIN DE LUXE PIE

2 1/2 cups milk
3/4 cup brown sugar
4 tablespoons St. Lawrence or Durham Corn Starch
2 eggs
1 tablespoon butter
1 cup seedless raisins
1 teaspoon vanilla

Scald 2 cups milk in double boiler. Mix sugar with corn starch, molasses with 1/4 cup milk, add egg yolks and blend thoroughly. Pour into hot milk. Stir constantly until thick and smooth. Add raisins, butter, and beat well. Remove from fire, add vanilla and pour into a baked pastry shell. Spread with meringue and bake about 15 minutes in a moderate oven (350 deg. F.).

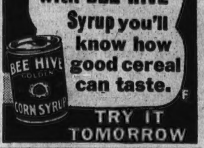

Alaska Uses Frozen Bread

Practical use of frozen bread is reported from Fairbanks, Alaska. Freshly baked bread is quick-frozen at 20 degree F., and is then shipped by train or aeroplane to retail distributors who store it in quick-frozen condition until the consumer requires it to be defrosted.

Anxiety was caused in Kenya by the delay in arrival of the rainy season. Known as the "long rains," the wet season usually lasts from April to June, but it did not begin until the end of May, when rain fell throughout the land.

Jellyfish contain between 90 and 98 per cent. water.

Once you sweeten your morning cereal with BEE HIVE Syrup you'll know how good cereal can taste.

Britain Has Long Purses

In Building Armaments She Could Outstrip Any Rival

Great Britain has to-day reason to be thankful that many years ago she pulled herself out of the depression and set her economic house in order, for that achievement gives her assurance that she can outstrip all her rivals in the armaments race. In the House of Commons recently Sir John Simon gave some figures to show what expenditure on armaments meant. The destroyer of to-day is nearly twice as big and costs four times as much as that of 1912. The cruiser also costs four times as much. The pre-war battleship of 25,000 tons cost £2,350,000, the modern 35,000-ton cruiser cost the staggering sum of £8,000,000. Aeroplanes also are far more expensive than the best machines used in the last war. The increase in cost is due not only to size but to science, as all fighting weapons are more complicated and every additional complication adds a few pennies to the cost.

It needs a long purse to stand such a drain, and Britain has the longest purse in Europe. When the figures of German air expansion are guessed, and the estimate appears terrifying, it is to be remembered that such a prodigious pace cannot be kept up indefinitely and that, given a period of peace, the country with the largest resources is the country that will win the race. A few months ago there was a near scare at the report that Japan was building 45,000-ton battleships, but fear on this head seems to have disappeared since Britain and the United States assumed the right to compete in this class if they wished. There could only be one end to such a competition, for the cost of a 45,000-ton sea baby would be much more than £8,000,000 and Japan is not able to afford herself many such luxuries at such a price—Toronto Telegram.

Exhibits From Canada

Attracted Much Attention At Agricultural Show In Wales

Canada fur furs, a wide range of Canadian agricultural machinery, Canadian wire fencing, tree-stump pullers, cattle feed grinders, and Canadian barn equipment attracted much attention at the recent annual show of the Royal Agricultural Society at Cardiff, Wales. Agriculturalists from Canada, the United States, Argentina, Australia, New Zealand and South Africa attended the exhibition.

The Statue of Liberty cost \$700,000. It is being repaired at a cost of \$1,700,000. That's what makes antiques valuable.

BREN MACHINE GUN CONTRACT IS DEFENDED

Ottawa.—A statement issued under the authority of Defence Minister Mackenzie stated the Bren machine gun contract, awarded last March to the John Inglis Company of Toronto, was for \$6,500,000, with a maximum profit permitted in the Canadian share of the contract of \$267,000.

The statement referred to an article in the current issue of Maclean's magazine by Lieut.-Col. George A. Drew. Col. Drew gave the value of the contract as \$8,000,000, and stipulated the maximum profit as \$457,000. The minister's statement comments on other statements which the article emphasized.

The minister's statement recalls the House of Commons speech of Feb. 14, when he suggested that all defence department contracts be referred to the public accounts committee of the House for examination. He deals with the work of Major James Hahn, promoter of the John Inglis Company, in interesting the British war office in the possibilities of manufacturing the Bren gun in this country, and explains how the major's proposals were reviewed by the national defence department and by the inter-departmental committee on control of profits.

The British and Canadian contracts are identical, the minister's statement says, and were given pursuant to the policy of establishing "shadow factories as a means of developing reserve manufacturing resources against an emergency."

Mr. Mackenzie says the estimated saving to the Canadian government is more than \$1,500,000, when compared with what it would have cost if Canada had not entered into a contract for the Bren guns in conjunction with a similar contract entered into at the same time by the British government.

Commenting on the periodical's claim that Col. Drew's statements are based on departmental records "as of Aug. 6," the minister says that "no legitimate access to departmental records of any date has been had by Col. Drew or by anybody purporting to represent him."

Aircraft Mission

Negotiations Are Reported To Be Nearing Completion

Ottawa.—Negotiations between Canadian aircraft manufacturers and the British air ministry's mission are approaching completion and the remain only a few finishing touches to be put to the proposals discussed during the past month.

The British envoys, Air Marshal Sir Edward Ellington, Sir Hardman Lever, F. Handley areas, H. H. Self, were in consultation with Major-General L. R. LaPêche, deputy minister of national defence. No statement was forthcoming.

Discussions with the Canadian aircraft industry have occupied nearly a month, during which efforts have been directed towards erecting an industrial structure in Canada capable of handling orders for aircraft and engines for the British air ministry. What form this would take, who would direct it, and how it would be financed and operated were the most difficult questions.

The plan contemplated establishment of a "parent company" in which all the present aircraft producers would have equal interest. This company would operate one, or possibly two, assembly plants, and its other function would be to farm out among the constituent companies the contracts received from the British government.

Eskimo Diet

Says White Men Are Biting Teeth Of Natives

Edmonton.—The white man is "making a good job of ruining the Eskimo's teeth," Dr. Roy H. Ellis, assistant professor of clinical dentistry at University of Toronto, said here after arriving by plane from Akivik, N.W.T. Eskimos who live on dried fish and dried meat have fine teeth but those who subsist on white man's food have the same dental troubles as white men, Dr. Ellis said.

Italy Starts Census

Rome.—Italy has started her special census of Jews. Questionnaires more than a yard long were distributed to all Jews and "suspected Jews" with the admonition that there would be severe penalties for those evading the census or giving false information.

Extend Welcome

Lord And Lady Stanley Entertained At Private Luncheon In Ottawa. Ottawa.—A formal welcome from the government of Canada was given Lord Stanley, British secretary of state for the Dominions, and Lady Stanley, by Prime Minister Mackenzie King, host, at a private dinner at the Ottawa Country club.

Guests included Lord Gowrie, governor-general of Australia, returning from a three-month visit to England; Sir Edward Ellington, British air marshal; and Wing Commander Robb of the British mission now surveying manufacturing and air training facilities in Canada.

Miss Jenny Morris, making a tour of Canada for a series of reunions of old veterans who found brother and friendship at her "mother's" hotel for soldiers in London during the war, also attended.

Ottawa guests included former Conservative leader R. B. Bennett and his successor, Hon. Dr. R. J. Manion and Mrs. Manion; Sir Francis Floud, British high commissioner in Canada, members of the diplomatic corps in Ottawa, and members of the government.

The Dominions' secretary and his party, including Lady Stanley and two sons, left for Toronto, where he will open the Canadian National Exhibition.

Preference On Wheat

Has Given Canada Slight Advantage On British Market

St. Anne de Bellevue, Que.—Delegates to the international conference of agricultural economics expressed belief that removal of Canada's wheat preference in the United Kingdom market would have no appreciable effect on the Dominion's wheat sales in the United Kingdom.

Dr. Charles F. Wilson, chief wheat statistician in the Dominion bureau of statistics, said the six-cent-a-bushel preference had given the Dominion a slight advantage in the British market. What disadvantage existed was felt chiefly by Argentina and the Danubian countries, and the United States within the past year.

Will Winter In North

Second Trip English Archaeologist Has Made To Arctic

The Pas, Man.—G. W. Rowley, 25-year-old archaeologist of Manchester, England, passed through The Pas today to spend the winter on the northern shores of Melville Peninsula, about 700 miles north of Churchill.

Rowley, making his second trip into the far north, said he considered the Eskimo diet of raw meat was fine and healthful. He is making the expedition on behalf of Cambridge University of which he is a graduate. "One must eat at least half the meat raw to avoid scurvy," the young archaeologist said. "It is really very good, especially if frozen."

Wireless Stations Planned

Work To Begin Immediately At Edmonton And Yellowknife

Edmonton.—Capt. W. W. "Wop" May, divisional superintendent of Canadian Airways Ltd., announced here work would begin immediately on construction of two high-powered, low-wave wireless stations at Yellowknife, N.W.T., and Edmonton. All company planes are being equipped with wireless sets and the Yellowknife station will be able to communicate with them in all parts of the north.

Baden-Powell III

Friends Uneasy Over Fear Health Of Boy Scout Head

London.—Friends of Lord Baden-Powell, 78-year-old founder and head of the Boy Scout movement, expressed uneasiness over his health, poor for some time.

Lord Baden-Powell, who sailed from Antwerp for Liverpool after a trip to Norway, was unable to attend a reception organized by Belgian Boy Scouts because he was unwell.

Judge To Retire

Calgary.—Associated with the bench and bar in Alberta since 1899, Judge Edward Peel McNeill, judge of the district court of southern Alberta at Calgary, will retire Dec. 23, when he will be 76 years old—the age limit for judges.

Compromise Proposal

Washington.—Informed persons said that State Secretary Hull had proposed to Mexico a compromise solution of differences over American expropriation of Mexican-owned agrarian lands.

Lost Russian Explorers

Convinced That Eskimos Actually Saw Craft Disappear

Barrow, Alaska.—A searching party returned from another fruitless hunt for the lost Russian transpolar plane, but members said they were convinced Eskimos actually saw Sigismund Levanevsky's craft disappear near Oulikut a year ago.

The party, headed by Dr. Homer P. Kellems of Delaware, Okla., made the search after erecting a monument near here to the late Will Rogers and Wiley Post, plane crash victims.

Rev. F. G. Kierepoker of Barrow, who accompanied Kellems' party to Oulikut, said they dragged waters where natives reported seeing a plane vanish last August, but the search was handicapped by bad weather and insufficient equipment.

"We spoke to many Eskimos who claim they heard the plane's motor," Rev. Mr. Kierepoker reported. "Their story appeared air-tight in answer to every question asked."

Levanovsky and five companions disappeared on a flight from Moscow, Aug. 13, 1937.

CHINESE-U.S. AIR LINER SHOT DOWN BY JAPANESE

Hong Kong.—One of five known survivors of 19 persons aboard a Chinese-United States-owned airliner described the terror and shooting of the occupants when Japanese pursuit planes forced down and machine-gunned the passenger craft on the south China coast.

The large land plane, carrying two women, a baby, and small child and 11 men as passengers and a four-man crew, was forced to alight on a small river between Canton and Macao.

H. L. Woods, of Winfield, Kansas, the pilot, reported Japanese airmen riddled the airliner as it sank. Besides Woods, the known survivors are his wireless operator, Joe Loh; a passenger, C. N. Lou; and two unidentified passengers. All on the plane except Woods were Chinese.

Lou said two Japanese planes opened fire on the airliner shortly after it took from Hong Kong. The pilot veered south from his westward course to shake off the attackers.

Later five pursuit planes attacked, diving close to the large plane so that it was forced down.

Lou, who reached a Macao hospital with a bullet wound in his neck, said some of his fellow passengers were wounded while the plane was still in the air and others while they were attempting to reach shore.

"The Japanese planes, after machine-gunning us while in the air, continued to go so low while we were attempting to go ashore," Lou said. "The Japanese pilots seemed determined to kill everybody. Before we could really get clear of the plane the Japanese returned and again machine-gunned us mercilessly."

"I was hit by a bullet in the neck and could do no more than swim and run blindly under the diving planes. My impression is that many passengers never had a chance even to get out of the plane."

Pilot Woods and the Radio Operator Loh escaped serious injury. Woods was taken aboard the United States gunboat Mindanao at Macao.

Two passengers unaccounted for were prominent Chinese bankers—Hsu Sing-Loh, member of the Shanghai municipal council and president of the National Communications Bank, and Hu Pei-Kong, general manager of the Bank of Communications.

EUROPEAN POLITICS "BLUFF"

Professor Ernest Barker, professor of political science at Cambridge University, is seen above as he arrived in Canada on the Canadian Pacific liner "Montrose." The Cambridge professor described European politics as a game of bluff, and thought no European countries could afford a large-scale war.

Work On Czech Problem

British Negotiators Wrestling With Minority Question

Praha.—British and Czechoslovak negotiators wrestling with the problem of Czechoslovak minorities seemed to have adopted the slogan: "Positive results before the Nazi field day at Nuremberg."

More work and deeper secrecy was the watchword both for the government and the British mission headed by Viscount Runciman. They appeared to want positive results by Sept. 6, field day at the Nuremberg Nazi party congress in Germany.

R. F. Ashton-Gwatkin, economic advisor to the British mission, flew to London.

"There was a spirit of government optimism, attributed by the foreign office spokesman to the understanding reached at Bled, Yugoslavia, between Hungary and the Little Entente nations of Yugoslavia, Czechoslovakia and Rumania."

The Czechoslovaks regarded their understanding with Hungary—Hungary agreeing to complete an aggression pact with each of the three Entente nations—as an advantage gained over Germany, also courting Hungarian favor.

Cattle Sale Outlook Good

Big Demand In East For Western Stock States Byers

Calgary.—Prospects for marketing western Canadian cattle in eastern Canada and the United States this fall rarely look brighter. Jack Byers, manager of the Western Stock Growers' Association, stated on his return from an extensive tour of eastern Canada and the eastern United States.

"Good prospects in Ontario and the Maritimes are excellent," said Mr. Byers, "and there is already a big demand for western cattle. The outlook is very good and eastern buyers are already on their way west."

Lighting Sets Off Dynamite

North Bay, Ont.—A bolt of lightning set off the charges of dynamite in 50 holes at a trans-Canada airport construction project near here. Only one of eight men near where the explosion occurred was injured, although rocks up to 300 pounds were shot into the air.

SPANISH WAR FACTIONS MAY CONFEE

The European press is greatly interested in the simultaneous appearance in Zurich, Switzerland, of Premier Negri (left) of the Spanish Loyalist Government, and the Duke of Alba, Spanish insurgent representative in London (right). Some newspaper reports claimed the representatives of the two warring factions had held a secret conference, but this could not be confirmed.

Pleased With Balkan Pact

Britain Regards New Measure As Answer Toward Peace

London.—General European affairs, including the new agreement between the Little Entente nations and Hungary, were discussed, it was understood, at a cabinet meeting attended by Prime Minister Chamberlain, Foreign Secretary Lord Halifax, and Sir John Simon, chancellor of the exchequer.

Official circles hailed the Balkan pact with satisfaction and did not interpret it as a diplomatic slap in the face to Chancellor Hitler of Germany.

Rather they regarded it as another step to remove causes of friction in Europe, particularly in the Balkan states which often are regarded as Europe's powder keg.

The agreement between Czechoslovakia, Yugoslavia and Rumania, on the one hand, and Hungary on the other, was announced at Bled, Yugoslavia.

Fine Was Necessary

But Amount Remitted To Ontario Pilot On Mercy Flight

Port Arthur.—Flying Alderman Al Cheesman went on an errand of mercy to Lale Royale to bring here for hospitalization two C.R.C. camp workers, and was threatened with a fine of \$1,000 by the United States immigration authorities.

Patients were Donald Watson and Lawrence Allen, who had been stricken with appendicitis. When Alderman Cheesman left Port Arthur he had no permit to fly into U.S. territory. He had, however, communicated with the U.S. immigration department at Duluth and got temporary permission to make the mercy trip.

"But remember, Mr. Cheesman," said one of the officers, "we'll fine you \$1,000."

"That didn't sound so good to me," said Alderman Cheesman, discussing the trip, "but in the next breath the official said, 'But we'll remit it.'"

GUARANTEE TO HUNGARY IS GIVEN BY GERMANY

Berlin.—Chancellor Hitler guaranteed the inviolability of the borders of neighbouring Hungary in an exchange of toasts with his guest, Admiral Nicholas Horthy, regent of Hungary, at a state dinner.

Emphasizing centuries of friendship and co-operation between Germany and the old Austro-Hungarian empire, Hitler said:

"This firmly-founded community based on mutually unshakable trust will be of special value to both people now that we as neighbors through historic events (union of Germany and Austria) have found our definite historical boundaries."

Admiral Horthy, in responding, stressed the three-cornered mutual friendship of Hungary, Italy and Germany and their common will for "just peace."

"The wish for continuation of peaceful reconstruction which unites us and our comrades is such insurance that our people can pursue successfully the high aim of peace based on mutual good will and justice through further close collaboration, thereby serving best their own interests and those of the rest of the world," the regent said.

Horthy visited the Hamburg shipyards on an extension of the tour which gave him a first-hand view of the German navy at Kiel and took him to the fortified island of Heligoland.

Field Marshal Herman Wilhelm Goering headed the reception. Hitler and Horthy strode side by side through the drizzling rain and reviewed a guard of honor. Horthy wore a full admiral's uniform and cocked hat; Hitler was dressed in a plain brown Nazi uniform. Madame Horthy was accompanied by Frau Goering.

Budapest.—Hungary's determination not to tolerate a Nazi movement was demonstrated on two fronts coincident with the high honors being heaped by Germany upon the regent, Admiral Nicholas Horthy. The Hungarian supreme court rejected the appeal of Major Ferenc Szalasi, leader of the Hungarian Nazi party, against the three-year prison term meted him for subversive activities. The court's decision is without appeal.

Four Nazis and 32 employees of the capital's municipal bus system were arrested for participation in the strike called recently in protest against decrees forbidding public services to belong to Nazi organizations.

CHINA CLAIMS JAPANESE USING POISON GAS

Geneva.—The Chinese government formally charged before the League of Nations that two battalions of its troops were wiped out by a Japanese poison gas attack near Chuichang, northeast of Juchang.

The accusation was contained in a note given the league secretary by Dr. Victor Chi-Tai Hoo, permanent Chinese delegate at Geneva, for the information of league council and assembly members and of the far-eastern advisory committee.

The note followed: "According to a report transmitted by telegraph by the command of Chinese troops in the Juchang sector in northern Kiangsi province, the Japanese who were at Chuichang northeast of Juchang, advanced on the night of Aug. 21 as far as Taw-uh."

"Two Chinese battalions then received the order to counter-attack and they succeeded in pushing back the enemy to the neighborhood of Chuichang. On August 22 at one o'clock in the morning the Japanese, prodding by the wind direction, released large quantities of toxic gas."

"With the exception of the battalion commander—who was wounded and taken to the rear before the gas attack—and two lieutenants and two officers—who were slightly gassed—all soldiers and men of these battalions are dead."

"It is held that the victims, who bled from the nose, were poisoned by asphyxiating gas."

Shanghai.—Reports from a dozen sectors of regular and guerrilla conflict in the valleys of the Yangtze and Yellow rivers reached Shanghai. Taken together, the reports showed little beyond the persistent scattered nature of the war between China and Japan and indicated no immediate, decisive stroke for either side.

Hankow was still the pivot on which the war revolved, with reinforced Japanese armies slowly jockeying for position to strike westward above and below the Yangtze to sever two railways which meet at the provisional capital—the Peiping-Hankow on the north and the Canton-Hankow on the south.

But the reports of guerrilla fighting in nominally Japanese-held territory illustrated the resurgent difficulty of the Japanese, the scope of their task of "pacifying" China. Much of this fighting was within 100 miles of Shanghai.

Crashing Pitch Barrel

Falls Nine Stories In Building In Montreal And Injures Two

Montreal.—A 300-pound barrel of pitch plummeted nine stories through stairway landings in the Windsor building on Bloor street, leaving two persons injured and throwing occupants of the office building into a panic.

Workmen tarring the roof lugged the barrel from the elevator at the sixth floor up the stairs towards the roof. The heavy barrel escaped from them and tumbled down the stairs. It bounced in the air and crashed right through the marbled stair landing.

Like some aerial bomb, the pitch barrel plunked through landing after landing on its noisy career to the basement. As it burst through each floor it set off sprinkler system, drenching stairway and corridors.

Fireman Jack Cloran, repairing a sprinkler valve on the sixth floor, was narrowly missed by the barrel. It broke away the landing he was standing on and he fell five stories in the wake of the barrel. Cloran was rushed to hospital with serious injuries to head, back, arms and legs.

The other victim was Harry Waldman, 35, partner in the Waldman Dress Company, with offices in the building. He was out of the building when the accident happened, but rushed in to see if his premises had been damaged. Running up the stairs, he dropped through the yawning hole in the first floor landing and was badly bruised. Waldman was able to go home after treatment at hospital.

The crashing pitch barrel, the sudden action of the sprinkler system, caused a general panic among the hundreds of people employed in the building, largely devoted to garment trade factories. Police and firemen quieted the terrified folk workers.

British Official Dies

Jerusalem.—J. S. Moffatt, British assistant district commissioner, died from five bullet wounds received when gunmen shelled district administrative headquarters at Jenin.

Blairmore, Alta., Fri., Sept. 2, 1938

THE CASE FOR ALBERTA

We are in receipt of a postal card from the Department of the Provincial Treasurer of Alberta.

The card contains the following information:

THE CASE FOR ALBERTA
Being the Submission of the Government of Alberta on Dominion-Provincial Relations

Date of Publication—August 20, 1938

The Province did not present its brief to the Royal Commission on Dominion-Provincial Relations, for reasons which were given when that body was appointed. Subsequent events have vindicated the Government's action.

The case for Alberta is now being submitted to the Sovereign People of Canada and their Governments as a practical contribution to the solution of our national problems.

The Second Part of the brief is devoted to a statement of the Provincial Government's case for Monetary and Social Reform.

Regular Price of Complete Brief, Post Paid \$2.25

Price on order received before September 15 next, Post Paid \$1.25

Address all communications to:

The Provincial Treasurer,
Legislative Buildings,
Edmonton, Alberta.

The provincial treasurer is to be commended for his efforts to recover some of the public money spent on the preparation of the Alberta Government's submission (that was not submitted) to the Royal Commission on Dominion-Provincial Relations.

We have not yet discovered just why the Alberta Government, after preparing their brief at a considerable amount of labor and expenditure of public money, did not present their case while the commission was in session in Edmonton.

Everything was ready and at the last moment the premier decided (or did Major Douglas do the deciding?) that the case should not be presented.

Now the Government apparently wants to acquaint the people with the case as prepared and have the nerve to ask people to again pay for the brief that they have already spent thousands of dollars in preparing.

We think it nothing short of impudence. The people are entitled to know just what their government had to say in the matter and it is the duty of the government to present the case to the people without asking them individually to pay any more. —Innisfail Province.

Under the heading "Teachers' Wanted" the Calgary Herald prints this unique appeal: "Splendid opportunity for conscientious man to care for 15 extra fine quality milk 50-50 basis. Experience unnecessary. Box 667, Herald." Apparently the little milk must catch up in their schooling, but what is the 50-50 basis?—Ex.

Even the fish in our streams are being licensed to bite. Jerry caught four in the Old Man River a few days ago, each wearing a metal license tag fastened to the lower lip. He claims that before the license fee was paid by the fish, both lips were held together by the wire fastener. Only one thing remains to be licensed now, and that is called clause. We heard a lot about a non-tax government around three years ago, but have yet to find it.

ALBERTA BRIEF IS ISSUED MONDAY

Emphasizing necessity of solving debt problems, the Alberta government's statement on Dominion-Provincial relations was issued by Hon. Solon Low, provincial treasurer, on Monday, urging a new economic order and proposing an inter-provincial conference to discuss confederation.

Recommendations to be made effective until a new social order is established and other recommendations for a new social order were contained in the brief which is being submitted to the Dominion government. The legislature at its 1938 session decided not to submit the brief to the Royal Commission on Dominion-Provincial Relations.

Briefly, the recommendations to be made effective immediately included cancellation of Alberta's debt to the Dominion for relief purposes; refunding of Alberta's public debt at not more than two per cent interest; Dominion assumption of unemployment relief costs and old age pensions and federal grants-in-aid for education, public health, mothers' allowance and highway construction and maintenance.

Just imagine that great reform that is to be accomplished in five years. At least six or eight persons, who formerly got along on a hand to mouth salary, will be able at the end of five years to retire in luxury. A great reform!

Even the statement of Magistrate Gibson is not to be swallowed seriously, according to Mr. Aberhart. But Mr. Aberhart's statements must never be considered untruthful (?) Take, for instance, his statements re the progress made by himself and his government in the last three years. Don't dispute them—oh, no, don't! They may be backed by some biblical prophecy.

There were a couple of other cases in which he may have incurred the spite of Aberhart, but the Powell-Urwin episode was the chief cause of his dismissal, Mr. Gibson said.

The premier, who is also attorney-general, had refused to see the magistrate after ordering his dismissal; he had refused to give any reason for the dismissal; and he had refused to comment when newspapermen asked him about it. But after the Edmonton Journal had published Mr. Gibson's charges, Aberhart issued a written statement, to which he referred as "brief" but which was considerably longer than all the quotations from Mr. Gibson's charge had been.

Aberhart did not deny, in his statement, the ex-magistrate's charge that the Powell-Urwin case lay behind Mr. Gibson's dismissal. He hinted darkly at the necessity for high ideals, discretion and efficiency on the bench, but did not accuse Mr. Gibson explicitly of failing to have any of these. He was quick to grasp at the point

NEWS FROM EDMONTON

(by T. B. Windsor)

Edmonton, Aug. 29.—Dark suspicion of each other, of their "experts" and other assistants, and of the election themselves hang like a cloud over the members of the government as this week opened.

Continued stalling on the proposed new scrap issue, on the Alberta "brief" up to this date, which is supposed to be a substitute for one which was to have been presented to the Rowell commission and will be issued this week, and increasing indications of an insurgency among private members with the help of at least one member of the cabinet, were reported to be contributing to the situation as it became increasingly dangerous politically.

But the cause of the worry to Premier Aberhart and the confidantes whom he hopes are remaining loyal to him for mutual benefit was the complete failure of the "Democracy Day" rallies of the party last week.

The case of A. H. Gibson, K.C., Edmonton police magistrate who was dismissed by order of the cabinet, aroused strong feelings against the government over the week end. Mr. Gibson declared that he was dismissed after a court issued a writ of habeas corpus, because he had refused to shirk his duty when the cases of G. F. Powell and J. H. Urwin, M.L.A., came before him last autumn. It was Mr. Gibson who committed them for trial by the supreme court.

He had received suggestions and threats, to induce him to lay the case aside, Mr. Gibson made known, but had refused to give the charges a fair hearing and a fair decision.

There were a couple of other cases in which he may have incurred the spite of Aberhart, but the Powell-Urwin episode was the chief cause of his dismissal, Mr. Gibson said.

The premier, who is also attorney-general, had refused to see the magistrate after ordering his dismissal; he had refused to give any reason for the dismissal; and he had refused to comment when newspapermen asked him about it. But after the Edmonton Journal had published Mr. Gibson's charges, Aberhart issued a written statement, to which he referred as "brief" but which was considerably longer than all the quotations from Mr. Gibson's charge had been.

Aberhart did not deny, in his statement, the ex-magistrate's charge that the Powell-Urwin case lay behind Mr. Gibson's dismissal. He hinted darkly at the necessity for high ideals, discretion and efficiency on the bench, but did not accuse Mr. Gibson explicitly of failing to have any of these. He was quick to grasp at the point

NEW GIANT LOCOMOTIVES ON CANADIAN NATIONAL

Steam locomotives continue to increase in size, notwithstanding the development of rival forms of motive power. Railroads are really the backbone of a country's transportation system and all it needs to prove this is to watch a modern freight train rolling along the rails at passenger train speeds or visit a busy railway terminal.

Mechanical experts are constantly at work devising more economical and more powerful locomotives and the latest of these are the new streamliners being put into fast passenger train service by the Canadian National Railways on the "International Limited," "The Maple Leaf" and "Inter-City Limited," on the Port Huron-Chicago run. The new giants of the rail are numbered 6405 and 6410.

Capable of developing 4,000 horsepower, they could move a train of 260 loaded freight cars, each of 50 tons, on the level at 10 miles per hour; could swing a train of 107 cars at 40 miles an hour on the same conditions, and pick up 100 loaded cars and run away with them at 60 miles an hour.

The firebox, which can burn six tons of coal an hour, is about the size of a fair-sized den in a home, being 10 feet long by 7 feet wide and 10 feet in height. The locomotive is fired by an automatic stoker and even the whistle and bell are operated mechanically, an air valve taking the place of the old-time whistle cord and air pressure operating the bell ringing. The eight driving wheels are each 6 feet, 5 inches in diameter and the weight of the engine and tender in working order is 332 tons.

Mr. Gibson had not yet made public the proofs of his charges. Of the Powell and Urwin case, the premier said that "most of us are so ashamed we have tried to forget all about it." He said that Mr. Gibson's belief that such an old case should be dismissed suggested his falling ability to weigh evidence.

He still did not deny the truth of the charge, but he reverted to attacks on newspapers—particularly the Journal—for having printed what Mr. Gibson said.

It was considered significant that no other member of the cabinet would say anything about the dismissal or the charge. And it was observed that although Aberhart ridiculed the idea that the Powell-Urwin case was still in mind, Aberhart himself had talked about it during the "Democracy Day" broadcast five days before, when the subject was raised by Hon. D. B. Munin in the pre-arranged radio dialogue.

The extent of the collapse of the "Democracy day" celebration, like a tub of cold water poured on the Social Credit party, was fully appreciated only at the end of last week when a news check indicated that not more than 2,600 people in the whole province, as a maximum estimate, had taken part in the meetings scheduled the previous Monday to celebrate the third anniversary of the Social Credit party victory at the polls. Hon. Lucien Maynard's weekly newspaper had given advance notice of the day as "holly day." On the broadcast during the day's "celebrations" cabinet ministers said that there were 5,617 attending meetings at Calgary, but a check there revealed only 500.

Even a galaxy of speakers and the Edmonton Social Credit band could attract only 210 at Vermilion. In Edmonton, although some estimates said there were about 1,000 present, and the cabinet ministers estimated 2,000, there were never more than 650 people at attending.

In its frenzied efforts to make the "Democracy day" celebrations appear successful, government propagandists sent out to each Social Credit group in advance ready prepared copies of telegrams and letters which were to be returned to Edmonton for reading over the air. In at least one case a message read during the broadcast was never actually received back in Edmonton.

As a result of the broadcast, the idea that there was a huge crowd linked up by radio became widespread in the province. Hon. E. C. Manning announced the singing of "O Canada," led by Edward Johnston. It sounded like a mighty chorus; it was, of course, a phonograph record used in the studio. "God Save the King" was announced at the end of the "meeting" which was attended by no one except six cabinet members; masses played, and again a great chorus sung. But again it was only a phonograph record.

Some folks have an idea that G. Dangreville, of The Porcupines district, is preparing for war. At least he is forming the nucleus to a little army, the youngest of six sons being but a few days old, and carries the kind of a French or Belgian frown that would make the big Hitler shudder. Anyhow, Mr. and Mrs. Dangreville are to be congratulated.

TURNER VALLEY IS EXAMPLE OF ORDERLY DEVELOPMENT

The orderly development of the Turner Valley oil field has been one of the brightest spots in recent history of the oil industry.

Discovery of a major oil field has frequently been followed by economic disaster, resulting in heavy loss and grievous waste.

This happens because the new field has to find its market, a process which means displacement of previous sources of supply, and conditions of surplus which upset sound business practices.

As soon as it was determined that there were large supplies of oil in Alberta, the major refineries stopped importing from Montana. They negotiated with the railways for a new freight rate schedule to allow Turner Valley crude to serve the entire prairie area.

This permitted price reductions. This year these price cuts will mean a saving of 5½ million dollars to prairie consumers on purchases of petroleum products.

A \$25 dividend was dug up in the Calgary district during the week. And the lucky finder of the twenty-five pieces of silver remarked, "Well, to get dividend you've got to work—dig, dig and dig!"

A Creston correspondent announces: An important change in the business section is announced for September 1st, when Dr. W. N. Fraser, of Blairmore, takes over the dental practice of Dr. G. G. McKenzie, who is leaving immediately for Vancouver. Dr. Fraser arrived the first part of the week.

Friends of the Family

Look at the packages on your pantry and bathroom shelves, and see what a multitude of brand names you recognize. Some of them have been familiar for years. You may have made the acquaintance of others only a few weeks ago. But even these are not suspected strangers. You have bought them confidently because they were advertised. And it is the same with your sheets and towels, your shoes and clothes, your electric appliances, the car in your garage—nearly everything you use.

Advertised products have a standing that commands respect. They are not nameless, but vouched for by responsible firms. The fact that they are advertised is in itself an indication that their standards of quality are strictly maintained, that they represent honest value.

As science and discovery go on, newly developed products are constantly being advertised—ready to help you save money and improve your standard of living. Every advertisement of such a product you read in your newspaper is a letter of introduction to a new and possibly useful friend.

It will pay you to read the advertisements in this paper. By so doing you will meet many choice products—worthy to become friends of the family.

A Big Bargain

We have completed arrangements with The Calgary Herald, by which we are able to offer

The SNAPSHOT GUILD AGAINST THE LIGHT

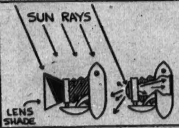

This scene was snapped against the light, so shadows come toward the camera. Ordinary exposure gives the silhouette effect. A lens shade must be used—if direct sun rays strike the glass, they spoil the picture.

HAVE you ever tried taking pictures "against the light"—that is, with sun or photo lights behind the subject so that the shadows point toward you instead of away from you?

This lighting is a source of many interesting pictures. Striking silhouettes of trees and persons can be obtained. Sunlight, coming from above and slightly behind the subject in an informal portrait, gives appealing highlights on hair and shoulders. Numerous "different" effects are possible.

When you take such pictures, your lens must be shaded so direct rays of sunlight or artificial light do not strike it. An inexpensive lens hood or sun shade (see diagram) is very useful, and slips on easily. Indeed, it is an advantage to use such a shade for many pictures. It cuts out stray sidelights and reflections, gives brighter, "snappier" pictures. Of course, when the sun is low in the sky—almost on a line with your lens, the hood may not help, but frequently you can find a position where the sun will be hidden behind a tree trunk. Then the shadow of the tree will serve to shade your lens.

In "against the light" pictures, 115

Note how lens shade (at left) protects glass from direct glare. Stray reflections are cut out, pictures are clearer, brighter.

shadow side, use an exposure two or three times as long.

For informal portrait studies, with the sun back of your subject, arrange a sheet of white cardboard or cloth so that it reflects light on the subject's face. And when the sky is the background of your picture, use a sky filter on the lens. This darkens the sky a bit and makes sunlit subjects stand out. It clips on the lens just as the sun shade does.

EATON'S**LOCAL AND GENERAL ITEMS**

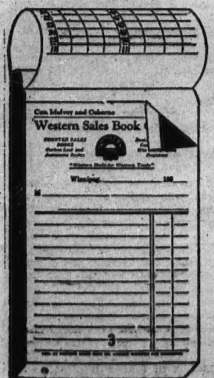

Miss Lillian Packer is down from Calgary on a visit to her parents.

Sergt. and Mrs. J. A. Cawsey and two daughters returned Saturday last from their vacation. The sergeant continued on to Edmonton on Sunday, returning Tuesday. Sergt. Jakemus, who had been relieving Sergt. Cawsey, returned to Cardston on Wednesday.

All rural schools in Alberta reopened for the fall term, September 1st, except where special permission to delay opening had been granted. Owing to the infantile paralysis epidemic, schools in Turner Valley are not expected to reopen until September 19th.

Mr. Business Man! How is your supply of counter check books? Six to eight weeks are required for delivery of these, so be sure your stock of books is sufficient. Counter check books can be ordered from The Enterprise at the same price you would pay for them at the factory or from an itinerant salesman. Just phone 11 and we will call.

Mrs. L. C. Chadsey, sister of Mrs. Stan Walker, of Pincher Creek, passed away at Brockville, Ontario, on August 31st, following an operation. She was but 38 years of age, and wife of Dr. Chadsey, formerly of Red Deer and Exshaw. Mrs. Walker was visiting at Brockville at the time of her sister's death.

BELLEVUE HAPPENINGS

Miss Olive Goodwin, who has spent the past month with her parents here, left Monday for Vancouver, where she will resume duties as nurse.

Mr. and Mrs. J. Longworth and son Jack returned over the week end from a two weeks' vacation spent at Vancouver and Victoria.

The home of Mrs. G. K. Sirett was the scene of a nicely arranged miscellaneous shower that claimed Mrs. W. Worobec (nee Ethel Clayton) as guest of honor. The evening was spent at various games which caused much merriment. Following the serving of a dainty luncheon, the Misses Norcen Cole and Enid Sirett presented the guest of honor with a well filled basket of beautiful gifts, for which Mrs. Worobec thanked her friends most graciously. The gathering dispersed about midnight.

Mr. and Mrs. J. Radford, Beatrice, Jessie and Sam, returned Saturday evening from a two weeks' vacation spent at western Canadian and U.S. points.

Evelyn Price returned last week from a vacation spent at the coast.

Mrs. Penman and Isa returned Saturday from a vacation spent at Sylva Lake.

St. Cyril's Roman Catholic church was the scene of a pretty wedding on Monday morning, when Catherine, fourth daughter of Mr. and Mrs. Wm. McInnis, was united in marriage to Ralph, eldest son of Mr. and Mrs. Robert Draper, of Hillcrest. Rev. Father O'Dea officiated. The bride, given in marriage by her father, looked lovely in a floor-length gown of white tulle, her veil being held in place by a coronet of orange blossoms, and carrying a bouquet of sweet peas and fern. She was attended by her sister, Miss Bonnie McInnis, who chose a water-blue gown with picture hat and matching accessories, and carried a bouquet of mixed flowers. The groom was supported by his brother, Mr. Harry Draper. Following the ceremony, a reception was held at the home of the bride's parents, only the immediate relatives and friends of the young couple being present. The happy couple left after luncheon for their new home in Excel, where the groom has accepted a position as school teacher. The best wishes of a host of friends go with them in their new home.

Rev. and Mrs. R. Upton, June and Mavis, returned Tuesday from their vacation spent at the coast.

Miss Ruby Cousins returned Sunday from a few days spent in Calgary.

The street oiling programme was this week extended to State Street.

The engagement of Miss Elizabeth Mary Arline, daughter of Mr. and Mrs. O. L. Reinecke, of Claresholm, to Mr. Rowland Hill, of Calgary, is announced, the marriage to take place October 5th at Claresholm.

Premier Aberhart for his subject on Sunday last took the theme "Develop a Radiant Countenance." There'd be no need for the request if everyone in Alberta were drawing down an income of not less than \$10,000 a year.

Lieut. Bill Matvenko, former amateur boxing champion of Alberta, was wounded in action on the Ebro front about July 26th, while fighting with the Mackenzie-Papineau Battalion on the side of the government loyalist troops in Spain.

John T. McAllister, 70, highly respected old-timer of the Pincher Creek district, passed away in the Holy Cross hospital at Calgary, following an operation for goitre. The remains were brought to Pincher Creek for burial, and the funeral took place yesterday afternoon.

Two more of the old landmarks are disappearing from Frank, one the residence near opposite the C.P.R. depot, at one time occupied by Mr. Wilson, and in which he conducted the post office for a great many years. The other is the old Thomas residence near the Huskies store. Both are being torn down to be rebuilt elsewhere.

EDDIE, THE AD MAN

IF IT DON'T PAY TO ADVERTISE, TELL ME WHY ARE ALL THE SUCCESSFUL GUYS DOING IT?

**HILLCREST HAPPENINGS**

Miss B. C. Sellen returned Sunday from Vancouver, where she had been holidaying.

Mr. and Mrs. G. E. Cruickshank and family were visitors last week to Winnipeg.

Mr. and Mrs. W. Brushett and son returned Saturday from a several weeks' holiday at the coast.

Mr. and Mrs. W. Adlam and daughter Mary are holidaying at Spokane. The stork visited here on Tuesday, leaving a daughter at the home of Mr. and Mrs. J. T. Crosby.

W. Rose was a visitor last week with his son at Saskatoon.

A. W. Chrysler returned last week to resume his duties as teacher.

Mr. and Mrs. H. O. Westrup returned home Saturday from the coast, where they spent their vacation.

Mr. and Mrs. P. Lelak are rejoicing over the advent of a daughter on Saturday last.

A farewell party was held at the Catholic hall on Friday evening last for Miss Molly Penn, who is leaving Hillcrest shortly.

Mr. and Mrs. W. Webster and family have returned from a several weeks' visit to Mountain View.

Mrs. L. Fumagalli, of Trail, was a visitor here last week at the home of Mr. A. Casagrande.

Mr. and Mrs. A. Marks and family were visitors to Calgary last week.

Mrs. Carpenter and daughter Ellis were visitors to Trail last week.

James Marshall, of Calgary, is spending a few days with his parents, Mr. and Mrs. S. Marshall.

James Smith, of Drumheller, is visiting his mother here, Mrs. J. Mackie.

Miss Bessie Davies returned Saturday from the coast to resume her duties as teacher at the local school.

Peter Iwaszuk left last week for Todd Creek, where he has been engaged as teacher.

Alex. Aitken is to leave Hillcrest shortly for New Zealand. He, with his wife and four children, will sail from Vancouver early in October on the liner Niagara, which ship he helped to build in the Glasgow shipyards prior to his coming to Canada.

Nurse: "Who stuffed that towel in the patient's mouth?"

Patient's Husband: "I did, because you said the main thing was to keep her quiet."

Teacher: "Yes, go on, Tommy. After the horse comes the motor car, and (prompting) after the motor car comes the —"

Tommy (whose father has a car): "Installation man, miss."

He was very angry with his tailor. "Why, the first time I buttoned this coat it split down the back," he stormed.

"That shows how well we sew the buttons on, sir," was the calm reply.

Mary: "I killed five flies today—three males and two females."

Housewife: "How can you tell a male from a female?"

Mary: "Well, three sat on the beer bottle and two on the mirror."

COWLEY HAPPENINGS

The Cowley school reopened Thursday with Miss Nellie McWilliam and Miss Madeleine Hewitt re-engaged as teachers.

The Ladies' Aid of the United church were entertained by Mrs. George Dwyer at her home on Thursday afternoon of this week.

D. R. McIvor, of Stettler, was a business visitor in these parts for a few days this week.

Major Schoof, of Claresholm, was renewing acquaintances here on Monday. The Major is 72 years young, and is the oldest Mounted Police in active service in the British Empire.

Miss Jean Porter has gone to take up duties as teacher at the Hazelmere school, south of Macleod. Miss Phyllis Porter is re-engaged to teach at the Pincher Station school, while Miss Winnifred Porter has accepted the position of teacher of the Halifax school, east of Pincher Creek.

The Welsh brothers, Wilfred and Harvey, threshed a field of wheat this week that averaged fifty-four bushels per acre and went 66 pounds to the bushel.

On Saturday afternoon last a handkerchief shower was given at the home of Mrs. Arthur Tustian, in honor of Miss Marion Morrison, who left Monday for Edmonton, where she entered the Royal Alexandra hospital as nurse-in-training.

Mrs. Mahieux, of Blaimore, is paying a visit to her parents here, Mr. and Mrs. Labonne.

Thanksgiving services were observed in the Anglican church on Sunday afternoon. The church was beautifully decorated with emblems of the harvest, representing the fullness thereof. A good congregation was present. Rev. Mr. Morrison took charge.

Mr. and Mrs. James Bennett will be moving shortly to make their home near Vancouver, where they will engage in farming on a small scale. An auction sale at their ranch on Monday was well attended and quite satisfactory.

Mrs. Lou Lemire and her three children have returned from an extended visit with relatives and friends in the Macleod district.

Miss Helen Morrison has gone to resume her duties as teacher of the Empress school.

Misses Essie Bennett, Dorothy Irwin, Stella McDonald, and Harold Smith and Pete Iwaszuk, have been engaged to teach the following schools, respectively: Olin Creek, Gads Hill, Tennyson, Tanner and Todd Creek.

Not satisfied with Aberhart's great promise of \$25 dividends, one guy, an M.L.A., would undertake to go still further and promise \$1500. Gee, what great things a weak Social Credit mind can conceive!

J. Penn, for quite a number of years power plant engineer with the Hillcrest Collieries, is resigning that position to take a similar post with the East Kootenay Power Co. at their Sentinel plant.

Mr. Aberhart declares that the dismissal of Magistrate Gibson was in the interest of efficiency. Well, not all the appointments to the magistracy of Alberta have been in the interest of efficiency, during the past three years, and no doubt Mr. Aberhart knows it well.

George Gordon, for many years publisher of the Ponoka Herald, has decided to retire from active newspaper work. His son, J. F. Gordon, who had been employed in a bank at Claresholm and during the past few months at Warner, will succeed his father as publisher.

The Beaver Mines Social Credit Group was reorganized on Sunday last. Mayor Williams, of Blaimore; Pat Lenihan, Communist organizer, and Stanley Pearson, of Pincher Creek, addressed the meeting. The new officers are: Julius Popovich, president; August Walldy, vice-president; W. Bremner, secretary; Mrs. W. D. Eddy, Mrs. Tratuck, John Opokski and Albert Kolan, committee.

Cliff Church has opened up a barber shop at Macleod.

Who ever had to pay five dollars for the privilege of dealing with a bank?

Thin men may be honest, but fat men find it a little difficult to stoop to anything low, too.

Thomas Hughes, of Mountain Mill, has had a visit from his brother and wife, of Nanton.

Pincher Creek has fallen in line with Blaimore, and are having their main streets olled.

Let the editor have a pay-day, too. Drop in with your subscription if it is due and unpaid. Thanks!

The flies are not half so eager to mess up our windows since they've been threatened with taxation.

When a mother told her little son that the new baby was brought along by the stork, he asked: "An' why don't they use the airplane?"

For the convenience of the Canadian National Exhibition Association and the public, the Imperial Bank of Canada will operate a special branch on the grounds, in the administration building, near the fountain, August 26th to September 10th.

WORLD HAPPENINGS BRIEFLY TOLD

Two squadrons, totalling nine officers and 175 men in all, of the Royal Canadian Air Force will be stationed in Calgary permanently.

First grain to be delivered to an elevator in Yorkton, Sask., from the 1938 crop graded No. 1 Northern and weighed 65 bushels to the bushel. It was Thatcher wheat.

Making the England-Australia trip in nine days as compared with 31 in surface transport, half-ounce letters at 14 pence (three cents) postage, are arriving at Sydney, N.S.W., on the new air-mail schedule.

President was set recently when the British post office department accepted designs by a woman for the new greetings telegram form. All previous forms were designed by unknown male artists.

Lady Tweedsmuir, wife of Canada's governor-general, has returned from a visit to the United Kingdom. She has been absent from Canada during the greater part of the summer.

Canada's national war memorial, now being erected in Connaught Place, Ottawa, will not likely be ready for unveiling this fall, it was learned. The probability is that the ceremony may go over until some convenient date next spring.

The new Upland airport, one of the finest in the Dominion and Ottawa terminal of the Trans-Canada Airlines, was opened officially Aug. 20 by Mrs. C. D. Howe, wife of the minister of transport, before a crowd of 5,000 persons.

A Chinese dictionary, claimed to contain all the different usages of words and phrases in the Chinese language, has been completed by Fu Ting-yi after 30 years' uninterrupted work. It is composed of 85 volumes and contains about 4,000,000 words.

Attendance at United Church Sunday schools in Canada has dropped 8.66 per cent. since 1932 but public schools have shown a decrease of 3.37 per cent. in the same time, according to a report prepared for the general council of the church meeting.

Reducing Hay Consumption

Mechanization in United Kingdom Means Fewer Horses Used

Increased mechanization is reducing the consumption of hay in the United Kingdom. For example, the Army which has 16,408 horses in 1933-34 has only 5,205 horses in 1938-39. The demand for hay also by collieries and railways which have been large purchasers of hay for horses is down at least 25 per cent. as compared with 1937. This year's hay crop in England and Wales is much smaller than last year's carryover from 1937 and the decreased consumption from increased mechanization militates against any large increases in importations of hay. However, importations of hay from Canada are likely to increase with the coming winter, but for the reasons stated it is not anticipated that the demand of hay from Canada will be greatly above the average.

The Latest Robot

Ticket-Taker Being Tested in South Carolina Theatre

Percy C. Osteen, theatre-manager for 19 years in Anderson, S.C., has invented a machine which automatically takes, records, and destroys show tickets.

Three years ago, with the assistance of his son, Harry Osteen, the inventor built the first miniature model in brass, and in October, 1935, carried it to Washington for the purpose of patenting it. Since then he has patented improvements so that the machine has been completed and is installed in the Osteen theatre. After being subjected to a thorough work-out under actual operating conditions, the device will be placed upon the market.

Game Known To Greeks

Horror-pitching does not get the headlines in the papers to the same extent as baseball or golf. Yet it retains its hold in country districts and if a history of 3,000 years counts for anything it will continue to appeal to young, middle-aged and even old men. The Grecian soldiers knew the game.

In all France there are only 25 radio stations, of which 14 are non-commercial and operated by the Government.

A school in Kenton, England, will have a fully-furnished flat where girls may learn how to run a home.

Potatoes are used in the manufacture of rubber.

Champion Wheat Passes

New Rust-Resistant Varieties Push-her Marquis Into Discard

The London, Ont., Free Press, says the battles of science are never final. Each victory merely marks the beginning of a new phase of the campaign for man's victory over the forces of nature. This truth is demonstrated by the fate of Marquis wheat.

When the patient research of the late Sir Charles Saunders resulted in a new wheat with high milling and baking qualities which would ripen considerably earlier than previous varieties the exploit was widely hailed. It has meant millions of dollars for Canadian farmers and indirectly has added Canadian industry to a similar extent. The wheat-growing district of Canada was pushed many miles toward the Arctic.

Now new varieties of wheat are pushing Marquis into the discard, and the Vancouver Province points out. With all its good qualities Marquis is susceptible to rust. Now Western farmers are turning to rust-resistant wheats. Over 96 per cent of Manitoba's crop this year is of this type, and most of it is the sensational new Thatcher wheat. Saskatchewan's experience with rust is likely to mean that a far larger percentage than the 15 per cent. sown this year will be in rust-resistant strains.

The Marquis tradition will be carried on, for most of the improved varieties are descendants of Marquis and have added its good qualities to their own new and distinctive ones. So doubt they will in their turn be superseded by improved varieties which will enable the West to contribute still more to the bread-basket of the world.

CHEERY AFFRONS TO SEW AT HOME

By Anne Adams

Such pretty dress-protectors for that wait of early-Autumn dress! Following frock fashions, they boast the new lower waistline—just wait till you see how becoming it is to the figure! Directions for both styles are included in Pattern 4929 and Anne Adams Sewing Instructor simplifies every move you make! Gay as gay can be are the edgings of ribbon or ruche—with extra "touching up" in ribbon bows and buttons. Note too that the shoulder straps will never shift down, and the belt holds in the slim waist. Choose sturdy "kitchen" cuttings and tricot, or "tea-time" dimities and batistes—and sew for gifts as well as your own needs. Pattern 4929 is available in sizes small, medium, and large. Small size, view A, takes 2½ yards 36 inch fabric and 1½ yards ruffling; view B, 2½ yards and 2½ yards ric-rac. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Patterns Dept., Winnipeg Newspaper Union Bldg., 175 McDermott Ave. E., Winnipeg.

In Class By Herself

Doctor Finds Toronto Girl Allergic To Her Own Hair

An unidentified Toronto blond told Canadians who are allergic to certain things like woolens and wild flowers. "Miss X" is allergic to her own hair.

Dr. K. A. Roberts said he "tested and tested" before he found out the cause of the woman's illness. He added that he intends to use a serum made from the woman's hair as a possible cure.

Illustrated above is one of the two plaques donated by the Wm. Wrigley Jr. Co. Ltd., emblematic of the Canada one mile swimming championship for men and for women held at the Canadian National Exhibition. Their size is 12" x 16". In each of them is illustrated the Canadian Beaver as well as the crest of the various Canadian provinces in official colours.

Bumpers Used As Aerials

Police Scout Cars Install New Antenna System

Police in radio-equipped scout cars will literally be able to carry on conversation with police headquarters through the rear bumper of the automobile in which they are cruising, as a result of a new antenna system developed in the research laboratories of the General Electric Company at Schenectady, N.Y.

The new antenna system uses the auto bumper as a radio transmitting aerial.

According to the inventor, George W. Fyler, the rear bumper makes a more efficient aerial for broadcasting from police scout cars than do the conventional running board, vertical and roof aerials heretofore used. The bumper, when used as an aerial, sends out the radio waves more nearly uniform in all directions, so that the signals can readily be picked up from all points by other scout cars or police headquarters.

Another feature claimed for the bumper aerial is that it is inconspicuous. It does not "give away" to the criminal the fact that the police car is equipped with a radio transmitter.

May Be Cabinet Change

If Ill Health Forces Finance Minister Dunning To Retire

Ottawa political circles are speculating over the proposed reorganization of the Dominion Cabinet in view of the strong possibility that ill health may force Finance Minister Dunning to retire from public life. The names of Revenue Minister Isley, Trade Minister Euler, and Agriculture Minister Gardiner are suggested for the Finance portfolio in the event of Mr. Dunning stepping out. Immediate action is expected.

Aerial Survey Completed

An extensive aerial survey of territories north of Yellowknife and Fort Reliance in the North West Territories was completed during August, five members of the Royal Canadian Air Force reported at Edmonton. They surveyed a wide area for geological and mapping purposes.

Must Be Authentic

In the royal archives at Windsor Castle there is a chart showing the descent of our royal family from David the shepherd king, in unbroken line. Since the Royal College Herald is responsible for its accuracy, its authenticity is beyond dispute.

Most Famous Tapestry

Tells In Pictures Story Of King William's Conquest Of England

Where shall we go to see the most famous piece of embroidery in the world?

We must go to France, to the library and museum of Bayeux, a town in the northwest, 18 miles from Caen. Its population is round about 7,000, and its majestic cathedral is 700 years old, though the crypt is older still. Old houses are here and there, all worth seeing, but we come first to see the celebrated Bayeux Tapestry, the oldest of all pictures illustrating British history.

A venerable and priceless treasure it is. Now light brown with age, it is 31 feet long and 20 inches wide. Its scenes and figures were worked with a needle and worsted in eight colors, and the theme is the conquest of England by William the First.

This great story is told in 72 pictures—living pictures if there have ever been any—and we see first Harold of England on his way to Normandy, and last of all the Battle of Hastings. As a border along the top run decorations in the form of animals, scenes from Aeschylus' Fables, and incidents of farming and the chase—did not our first William love the tall deer as if he had been their father?

Described years ago as the noblest monument of its kind in the world, it is locally believed to have been worked by the Conqueror's wife. It is certainly 800 years old, and may be considerably more. It is of supreme importance to students for its details of customs and dress. After being sent on his way by Edward the Confessor we see Harold of England crossing the channel in a single-masted ship, and as he lands we see him taken prisoner by a man on a yellow horse. At Bosworth he is honorably treated till a messenger reaches Duke William's court, the king sitting on a chair like a fence, and a man keeping watch from a tree.

So it goes on, this amazing pattern which has escaped countless dangers and come down to us to-day as an heirloom beyond all price.

College Man (who had come to work in the harvest): "I have only one request to make."

Farmer Brown: "What is that?" College Man: "Please let me stay in bed long enough for the lamp chimney to cool off!"

A Japanese legend has it that music was devised by the gods to lure the sun goddess from a cave where she had retired.

THE CANADIAN ARMY IN ACTION AT PETAWAWA

This photograph, showing a machine gunner firing at Petawawa Military Camp, is a very unusual picture. It not only shows the shell, which weighs 100 pounds, as it disappears at the top right, but is also shows a well defined smoke ring which is seen only under very calm weather conditions.

—Photo of Maves, Artana Studio, Pembroke.

SUNDAY SCHOOL LESSON

SEPTEMBER 4

SAMUEL: SPIRITUAL REVIVAL

Golden text: Direct your hearts unto the Lord, and serve him only. I. Samuel 7:3.

Lesson: I. Samuel 7:1-17. Devotional reading: Psalm 125.

Explanations And Comments

Penitence and Confession, I. Samuel 7:2-4. Religious life had come to a very low ebb among the Hebrew people before this great awakening under Samuel took place. They were worshipping the gods of the native peoples about them, and accompanied with this worship were sometimes most heinous ceremonies. Had matters gone on as they had been going for another fifty or a hundred years it would seem that a pure monotheistic religion would have utterly disappeared.

Direct trouble with the Philistines finally brought the people to "lament after Jehovah." It was when Israel was badly beaten in battle and threatened with overthrow and annihilation that she awoke herself to her apostasy and turned her face toward Jehovah again. Would the repentance be short-lived? Samuel strove to make it lasting. He exhorted the people to prove their repentance by serving Jehovah only. "If you do return unto Jehovah put away the foreign gods from among you"—destroy the images they were worshipping and the altars and groves where they were worshipped. "And direct your hearts unto Jehovah, and serve him only, and he will deliver you out of the hand of the Philistines." And the people obeyed.

"No man can serve two masters." Prayer and Sacrifice, I. Samuel 7:9. The Philistines evidently thought that the Israelites had assembled preparatory to an attack upon them, and that a swift attack on their part would secure them an easy victory. In the battle with the Philistines recorded in our lesson last week, the Israelites had relied in vain upon the ark to save them; now on learning of the approach of their enemy they sought Samuel to pray to God for help. Samuel answered him with a great shout offering (which symbolized the self-dedication of the worshipper), and cried unto Jehovah for his people.

The Victory, I. Samuel 7:10, 11. And Jehovah answered Samuel—he answered him with a great shout that day. Compare Ex. 29:3. For men of the plain, as were the Philistines, the crashing reverberations of the thunder among the hills and the binding flashes of lightning held double terror. It threw them into confusion, and then the Israelites rushed upon them and completed the work which the storm began. The scene of the Philistines' former victory became the scene of their utter rout, and they were pursued by the Israelites as far as Beth-car.

Misleading Statistics

Trade Returns Between Denmark And Canada Not Accurate

One of the cases where statistics may be misleading is to be found in the trade returns between Denmark and Canada. In Denmark, statistics of imports are based on the country of purchase. Most of the Canadian wheat imported into Denmark is purchased in New York and is therefore credited to the United States. According to Canadian statistics the Dominion's exports to Denmark were valued at \$1,088,507 for 1937 which is approximately twice the amount credited to the Dominion in the Danish returns.—Department of Agriculture.

Because of tiny differences between the larynx and palate of the Chinaman and those of the Anglo-Saxon, Chinamen cannot pronounce the "r" sound with any degree of accuracy.

There are 17,000 motion picture theatres in the United States, with an average total attendance of 13,000,000 nightly.

Health LEAGUE OF CANADA

To Test Oxygen Mask

Research Flight At High Altitude Made By Howard Hughes

Howard Hughes, "round-the-world and transcontinental record holder, has hung up another aerial record but it was only incidental to a research flight.

Winging non-stop from Los Angeles to New York to test a new type of oxygen mask for high altitude flight, Hughes, in his "round-the-world transport" type plane, the "Hugoboss," in 10 hours, 34 minutes, beating the best previous transport record by almost 30 minutes. He flew at an average altitude of 20,000 feet.

In January, 1937, however, he crossed the continent in seven hours, 28 minutes and 25 seconds in a special racing plane.

Landing at Floyd Bennett airport, Hughes and three companions said the new type oxygen mask held great possibilities for future flight at extremely high altitudes.

"Ultimately," Hughes said, "transport operations will be conducted at altitudes of around 30,000 feet. Our present equipment and engines will not permit regular flight at that height. The point I want to make is this: That as an airplane leaves sea level the man at the controls becomes less efficient."

"A good oxygen mask, permitting the pilot of the transport to breathe oxygen and air of the same density as that at sea level is going to do much toward making high altitude flying easy and efficient."

Will Record Lightning Bolt

Niagara Power Device Picks Up Storm Even At Distance

A machine which records lightning bolts as ink scratches stood ready to put the "history" of Western New York's next electrical storm on paper.

Every lightning bolt within 15 miles of Buffalo is recorded on a device constructed by the Niagara Power Company. It enables experts to tell how the company's equipment holds up during electrical storms.

The machine can be used to foretell the approach of the storm by picking up bolts at a distance. During a terrific thunderstorm in Buffalo recorded 2,200 bolts in the area, the highest number on record. The previous high was 1,000, recorded a year ago.

Bolts are "picked up" on an antenna similar to that on a radio.

Refused Side Lines

Author Stuck To Writing And Proved Decision Was Wise

When radio offered the late O. O. McIntyre, writer of the syndicated column, "New York Day by Day," \$5,000 a week "for less than a minute before the microphone for a period of 26 weeks," he said he thought he had "better stick to the letter," as he called his column. On the same ground he resisted all temptations to indorse advertised products, make movie shorts or otherwise pick up money on the side. The "letter," in his last years, netted him nearly \$3,000 a week.

Deportation For Blasphemy

British Authorities Have New Law To Banish Undesirables

Aliens in Great Britain who blaspheme may now, under a new bill, be liable to imprisonment and deportation. This will strengthen the hands of the British authorities, who sometimes have difficulty in finding sufficient reason for expelling known undesirable. Bols and the East End are hotbeds of alien riff-raff who revel in blasphemy. This eloquence, however, will be disastrous in the near future.—London Sunday Express.

More than 100,000 men and women are employed in England's cut-throat trade.

POOR MAN'S GOLD

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER • W.N.U. SERVICE

CHAPTER III—Continued

They were hearing the more populous regions of the camp. Hammond turned to her.

"Let's be frank. You want me to get you past Sergeant Terry. Is that it?"

"That's what I'm mind."

"In other words, take that extra dog team of mine, and the supplies I had intended to leave behind, and say they're your own?"

"It was just a desperate idea. To ask you to let me pretend to the sergeant that these things were mine, drive them through and then turn them back to you."

"After that?" asked Hammond.

She shrugged her shoulders.

"I spent almost my whole life in the north—until a short time ago. If the world has to come to an end—"

She halted, as though she had said too much. Hammond was silent. They reached a fork of the icy trail; one led to Hammond's tent. "Good night," she said.

A sudden wave of impulsiveness shot through Hammond. His mitten had touched her shoulder.

"You've given me an idea," he announced. "Get up early to-morrow. I'll have the dogs and that sled full of stuff at the restaurant a little before daylight."

He hurried on, with her gasp of gratitude faintly following him. The next morning, in the dull gray of a snow-clouded dawn, Hammond walked to the all-but-dismantled camp with Sergeant Terry. Toboggans were packed; already team after team of dogs, equipped in their harness, were spotted about the lake, the upper reaches of which led to the valley of the Caribou. There was shouting and hurried preparations.

"I see that girl's supplies came in all right last night," the sergeant said.

"Oh, yes," Hammond's voice was casual.

"Nice hitch of dogs, she's got."

"The sergeant grinned broadly. "Well, I guess if I owned a river bed full of gold, I'd be doing the same fool things myself." Dismissing the subject, he shouted, "Hey, Annie, all set?"

More and more men—and women—with pack sacks, more dog teams, more sleds and toboggans assembled on the lake, until the foreground was black with humans. Hammond involuntarily looked about for Jeanne Towers. She was there, and the man saw from the way she handled her dogs that she had told him no falsehood.

At last the sergeant raised his gun. The barking reverberation of the long-barreled revolver broke crisply against the sharp morning. A cheer came from a prospector's throat, to be taken up by other men and punctuated by the high cries of women. A trapper remembered that he too had a gun, and fired it into the air. Immediately a dozen others joined him; the cries and shouts and booming of firearms rose to a thundering peak. Then as quickly came dead silence, as if these people had remembered the gaunt, cruel journey before them. Hammond's voice sounded crisply.

"All right, string out! Slip into the trail and start mushing. Don't try to rush—you'll be a long time getting there."

A driver yelled to his dogs. One by one, others followed. What had been an indiscriminate mass of cheer-

ing humans became a long, black, crawling line. It twisted across the lake, whithered into the valley of the Caribou which lay beyond and crawled laboriously toward the first rise of nearly two hundred miles of mountains, of plateaus and valleys and lakes and icy streams, along the great white trail to a new bonanza.

Two weeks later, they were still at it, moving more slowly now along an agonizing journey, broken often by slides of loosened snow in the narrow valleys, where hills rose precipitately, or where the willows, thick and tangled, blocked progress until a trail could be cut through. Everyone was tired—especially Hammond. Twice a day, he must make the line of march from one end to the other. It was hard going to-day; a chinook had been blowing.

"Here, take this stick," he called, as he passed Jeanne Towers. "Use it to keep your snowshoes clear."

"Thanks, I've got one—on the toboggan. I've just been watching for a stopping place, to change snowshoes and have a general clean-up."

At Last the Sergeant Raised His Gun.

Hammond fell in beside her. For a moment, there was little sound save the quick breathing of dogs, the slide of toboggans and the cluff of snowshoes, punctuated by quick tapping noises as mushers hit their heels on the rising step with light clubs, to free them from chinook-sticky snow. The shouting and excited conversation long ago had passed. This was grueling effort.

"Like the North?" he asked.

"Something like a Lombay's happiness blazed in her brown eyes."

"Oh, I do. It's so clean."

"Jack went, wondering about the remark. After a long time, he began thinking of some of the city rooming houses in which he had spent out-of-luck days; grimy windows, carpets gritty with dirt, soot on one's face, a black taste to the air."

"Better not wait too long to make camp," he shouted to one of the old-timers. "We'll get out early to-morrow on the crust."

But late that night, when the rest of the camp was sleeping, Hammond saw that there was to be no crust on the morning's snow. The chinook had continued, veering slightly toward morning. Dawn was gray, lowering, cheerless. Then the wind shifted. A bit came into the air.

"Yah, we'll have snow," it was Olson, the man with the heaved-out face whom Hammond had met in Prince Rupert. He paused a moment as the long line began to move.

"Yah, we'll have plenty of snow," Hammond nodded and went onward. He would have a job to-day. It was hard enough keeping this line moving in the sunshine. Morning became early afternoon. The sky grew heavier, more ominous.

"No leading!" he shouted, as the trek started anew, following the nighttime habit. "And no hanging back."

A stoop-shouldered man turned his head; skin raw from pelting ice

particles, eyes like balls of blood from snow burn.

"How'll we ever keep in line and change wet moccasins?" he queried. "Keep 'em on, I suppose, and get frostbite?"

"We'll make stops for that." The first slash of snow had begun to drive down out of the high reaches of the mountains. "Keep moving—and stay together!"

The flakes had become thicker now; like a sticky white shield. All in an instant, the mountains began to fade.

"Stay together!" he shouted, as he worked back along the line. "Stay together!"

They had come out of a valley to a wide lake and were now well upon it. On his lumpy snowshoes, Jack made the end of the line, shouting his caution, and hearing it echoed by the more experienced men of the long serpentine of gold seekers. The sound of clucking as sticks rapped against snow-gummed webs was general now. The world had become a fog of white. Once again Hammond started forward, hurrying at the blurred sight of a laggard beside the trail. With some surprise, he saw it was Jeanne Towers.

"What's wrong?" he queried brusquely.

"My lead dog broke his trace. I think I've got it fixed."

Hammond examined the harness. "Looks all right," he decided.

"We're going to camp as soon as we strike the end of this lake," he said. "And then how far?" asked Jeanne. Hammond had heard that query a hundred times in the last few days.

"Oh, we're well over the worst of it. We'll have a tough time for a while after we get out of this lake country—have to hit for the plateaus—the winds are pretty bad there. Then we'll drop down to the Liiken river—going should be fairly easy after that."

"How far?" the girl asked again. "Sixty miles. A man could make it in two days with a fresh team."

Hammond went on toward the head of the line.

"When do we get to the end of this lake?" shouted the lead musher. A note of panic was in his voice. Hammond turned swiftly, glancing down the line.

"Olson!" he shouted. "Take the lead here and hold it. When you hit the shore line, go into camp!"

"Ay!" came the answer. Olson, with his elongated web, strode out of line, rounded those in front of him, then began to plod again. Hammond once more moved swiftly toward the rear, only to return more quickly. At last he reached the side of the leader and strode beside him, staring back into the snow.

"Somebody's missing," he told Olson. "I'll try to find 'em. If I'm not back by morning, hold camp and start out a gang to look for me."

(To Be Continued)

Not Often Seen

The holy crown of Hungary was exposed to public view for the first time in 30 years in Budapest in honor of services held to mark the 1,000th anniversary of the death of St. Stephen, first king of Hungary. The crown was put on view in the white marble hall of the royal palace in Buda, on the right bank of the Danube.

A source of poultry food is derived from the flesh of sharks.

Shipwrecked Sailor: "Thank Heaven! Civilization again at last!"

—Settello, Rome.

Some Curious Clocks

Towns In Morocco Have Quickest One In The World

In the Swiss stand at the Paris Exhibition last year one of the most interesting features was the world's smallest watch, the size of a small Canadian cent. Switzerland has always been famous for its watches and clocks: the latest device from that country is a clock that has no face. It has an automatic phonograph arrangement inside, and when you press a button the clock calls out "Twenty past two," or whatever the time happens to be.

Just beyond the borders of Switzerland, in Munich, a doctor has invented a sleep-room clock. Here the patient presses a button, and a magnified shadow of the face of the clock is thrown on the ceiling, so that he doesn't have to crane his neck to see the time.

An even stranger clock is to be found in a remote little American town. It consists of nothing but a face, hands and a single lever. This lever is connected to a greaser which spouts a column of hot water out of the earth every 38 seconds, each spout moving the hands forward just that amount. As the spouting never varies by a fraction of a second the clock is always accurate.

But it is to Fex, a town in Morocco, that the honor must go of having the world's queerest "clock." One of the houses has, jutting out about a foot from the wall, the butt-ends of 12 beams. Precisely at each hour, an attendant comes out and places a flower-pot on the end of one of the rafters. At twelve o'clock all the pots are cleared away and the process is begun over again!

New Wing Formation

Will Give British Plane Increased Endurance In Air

A high-speed flying wing capable of carrying a load more than 10 per cent. heavier than orthodox commercial planes is being constructed at Whitney, England.

It is designed for a loaded weight of 35,000 pounds. With three engines of 1,000 horse power each it will have a top speed of 300 miles an hour and a cruising speed of 255 miles an hour at 10,000 feet, and will carry a commercial load of 19,500 pounds. This represents 51.6 per cent. of the loaded weight compared with 40 per cent. usually obtained in the orthodox type of plane.

It will have a range of 2,760 miles carrying 20 passengers, their luggage and a crew of six.

The idea includes arrangement of the lifting surfaces on a rectilinear plan and giving sufficient depth to the wide wings to enable them to serve as passenger cabins.

The wing formation, which affords lifts at the take-off and also provides accommodation for passengers, is a new one. It has been shown in experiments not only to be virtually non-stalling, but also to give the maximum lift at and beyond the angle of incidence required for landing. Specially shaped wing-tips are said to give a similarly delayed stall in lateral control.

Around the coast of Britain there are about 290 life-saving stations and 4,000 volunteers and members of life-saving brigades, in addition to the regular lifeboat service.

Why wait longer for the convenience of ELECTRIC LIGHT? Bring your suburban home or farm up-to-date and do away with dangerous old style forms of lighting. Install an inexpensive Choro-Horse and have brilliant ELECTRIC LIGHT combined with POWER for your Radio, for Charging Batteries and for powering hand machines. A simple attachment, the Johnson Pump, provides a constant supply of water to all buildings.

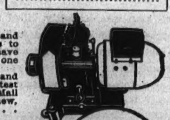

All models are compact, pre-wired, built and portable, in capacities from 150 watts to 800 watts, making possible for you to have from 6 to 32 25-watt lamps in use at one time. Learn about these remarkable light and power plants once with their latest advancements and exclusive features. Mail your order today. Receive your copy of the illustrated, fully descriptive folder it's FREE.

Old Mother Earth

Brightest Painted Lady In Solar System

Sweden Starts Astronomers
The old mother earth, viewed with the astronomical looking-glass of the moon, is the brightest painted lady in the solar system.

The moon-mirror studies were described at Flagstaff, Arizona, by Dr. V. M. Slipher, director of the Lowell Observatory. During a total eclipse of the moon, the earth's shadow falls to hide the moon completely. Deep red rays from the corona-like sunlit ring of the earth's air keep the moon just barely visible.

The astronomers, examining these rays as the moon mirrors them back to earth, find that they come from sunlight shining through the lens-like earth's atmosphere.

The earth, then, during eclipses, wears a splendid halo in the form of a rainbow tinted around her face like a poke bonnet. The rainbow is produced by the atmosphere around her rim, which refracts—bends the rays—and selectively absorbs them, thus greatly accentuating the reddish tones.

When her face is in sunlight the earth becomes one of the albinos among planets. She reflects more light than most of them. The astronomical term for this reflection is albedo.

Factory Being Enlarged

Fireproof Addition To Shredded Wheat Plant Under Construction

A fireproof addition to the plant of Canadian Shredded Wheat Company Limited, Niagara Falls, Ont., is at present under construction. When completed the total floor area of the plant will be increased by more than 50 per cent. The new building is being constructed of skeleton steel beams with reinforced concrete, fireproofing and floor slabs, maple floors and face brick exterior to match the present building. When the enlarged plant is in full operation the number of employees will be increased 150 per cent. It is expected that the building will be completed in December. About 390 tons of structural steel will be used. The enlarged plant will manufacture a full line of "Shredded Wheat" products, including some not manufactured at present.

Breakfast For A Penny

Scheme Inaugurated At Port Of Spais Is A Success

A penny breakfast scheme, inaugurated in Trinidad more than two years ago by the Port-of-Spain Conference of the Society of Saint Vincent de Paul for school children and aged people within the city, is progressing satisfactorily.

During the first six months of 1938, no less than 48,220 breakfasts were issued at a penny each, and plans to expand the idea are being considered by the society.

The mortality rate among manuscripts is frightfully high. It is frequently estimated that 98 to 99 per cent. of the MSS. submitted to editors and publishers never get into print.

With old cans and scrap metal and 700 hours' work, C. Gilbert and G. Horlock of Great Missenden, England, have made a bicycle of 800 parts.

Impossible To Eradicate

But Physical Fitness Great Factor In Fighting Any Disease

A recent incident in the career of the Eltona quintuplets at Callander, Ont., gives convincing proof of the impossibility of entirely eradicating illness, even when isolation is as perfect as it is possible to make it, when every precaution is taken to ward off attacks by germs to which the average human being is exposed.

The quintuplets were recently withdrawn from the usual public exhibitions because of tonsillitis. They were the victims of the kind of "wore throat" that is the plague of infant exonerates and attacks almost every youngster sooner or later.

But the quintuplets have had a model existence since birth. They have had the advantage of every scientific aid to health, they have led purely hygienic lives. They have been protected by every artifice of medical skill. How is it, then, that they have defective tonsils, like any ragged child who has been poverty-ridden?

That is a puzzling question which suggests that it is practically impossible to guard human beings against disease germs. The case of the quintuplets is likely to be the outstanding experiment in the effort to ward off harmful germs that Canada may hope to witness, yet the bacteria responsible for tonsillitis has been able to break through what was regarded as an impervious defence. No one can explain how it reached these children. It must have been carried in the air.

There is this about the situation, that these children had a rapid recovery and the lesson, the lesson is that while modern science may fail to shut out the harmful germs, it can produce in human beings, a condition of fitness that is likely to ensure a victory over disease when it attacks. It seems that human beings have need of good food and hygienic environment in order that their constitutions may be so fortified that they can overcome the enemy disease germs when they make their inevitable attacks.

From the Sarnia Canadian Observer.

The Indian Language

Nearly All Tribes Have Practically Abolished It For English

Apparently, even in the far north, the Indian is losing his language and adopting English, says the Sault Ste. Marie Star. There may be isolated tribes yet where the Indian is still treated by English, but this is doubtful. The Indian and Eskimo are so dependent now on the outsider that they can hardly escape soon losing their old ways of life, and with the loss of their unwritten language the curtain is bound to ring down on tribes that have for ages preserved a strong individuality.

What Hullo Means

When you shout "Hullo!" you are really saying "A loop!" the warning given by forest rangers in the old days, and equivalent to "Wo!" It is said that "Hullo!" still survives in Charnwood Forest, England, as a hailing term. If you repeat "A loop!" pronounced "Ab loo!" quickly you will see how "Hullo!" arose.

The highest speed anyone ever attained in an aeroplane is 423.3 miles an hour. Lieut. Francesco Rello of Italy set it.

For Your Preserving

THE PUREST SWEETEST SUGAR
CANADIAN SUGAR
CORPORATION LIMITED

Use It This Year

Blairmore schools reopened for the fall term on Monday.

Alberta's brief is said to contain 200,000 words. The draft must have been a woman.

Aberhart's Sunday broadcasts have become so unimportant that it has been decided to remove the "b" from the word bull.

The Alberta taxpayers provide excellent purchasing power for the members of the provincial government.

Mr. and Mrs. Charles Clark, junior, of High River, called on The Enterprise on Wednesday afternoon, returning from a holiday trip as far as Coeur d'Alene, Idaho.

One man was instantly killed and two others seriously injured on Tuesday night, when C.N.R. President S. J. Hungerford's special train crashed into an automobile at a railway crossing near Wayne.

T. Allen and family were visitors to the Logan Pass on Sunday last.

We would suggest that Aberhart's subject for next Sunday should be: "Why all these false promises?"

Members of the Alberta Press are shortly to receive medals for their expressed correct opinions of Social Credit, dividends, etc.

Mr. and Mrs. J. R. Gresham, of Whiskey Gap, spent Sunday with the former's parents here, Magistrate and Mrs. J. W. Gresham. Mrs. L. Dunkley, who had been visiting at the Gap, returned with them, later to return to her home in Calgary.

During a visit of some three weeks with her brothers, L. L. Morgan, of Blairmore, and R. W. Morgan, of Pincher Creek, Mrs. J. H. Oko, of Spokane, accompanied Mr. and Mrs. R. W. Morgan and Mr. and Mrs. L. L. Morgan on a motor trip to Banff, Lake Louise and over the new Jasper and Logan Pass highways.

Local and General Items

The Editor will be glad to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, showers, presentations, anniversaries, etc. Phone items in to 11 or hand them in at The Enterprise office not later than Thursday evenings.

A forest fire has been raging for several days on Alexander Creek.

J. H. and Mrs. Farmer were motor visitors to Edmonton over the week end.

Thomas Niven, of Lethbridge, has completed fifty years membership in the I.O.O.F.

If we ever got rid of Mr. Aberhart, we should try out Hepburn. Perhaps he's worse.

That fence underneath a certain Alberta daily should be getting quite shaky by now.

At the beginning of August, the Perth (Ontario) Courier entered its 105th year of continuous publication.

May be Gibson was as well qualified as a magistrate as Aberhart ever was as an attorney-general. "Efficiency, thou art a jewel!"

Greater gall hath no man than this: that he exhorteth his people to wear a happy countenance amidst poverty, while he himself wallows in wealth.

Aberhart has talked a lot about "the will of the people," but what would happen if we were to have a Social Credit police force and a Social Credit court?

Robert Beddington, brother of Fred Beddington, of Coleman, passed away at Salmon Arm, B.C., last week. Mr. and Mrs. F. Beddington and son Fred motored to Salmon Arm to attend the funeral.

John Aschacher, for over thirty years a highly respected citizen of Blairmore, and who is now near the three-score-and-ten mark, left Tuesday for Prince Rupert, B.C., where he will reside with his son Pete.

Many a poor down-trodden creature in Alberta shuddered with spite against our premier following his advice on Sunday last to "Develop a Radiant Countenance." Isn't it time that he expressed sympathy with the poor misled people in some sort of a practical way?

Mrs. Alice Bowerman, wife of Mr. Glen Bowerman, of Cowley, passed away at New Westminster, B.C., early this week, aged 51. She is survived by her husband, Glen Bowerman, and a daughter, Mrs. Earle Bohmer, both of Cowley. The remains were laid to rest at New Westminster yesterday.

Miss Janet Nicol, of the Edmonton teaching staff, who had been spending part of her vacation with friends in Blairmore, left for Edmonton today. She was accompanied as far as Calgary by Mrs. J. W. Gresham and Mrs. L. Dunkley. Mrs. Gresham will visit with the Dunkleys for a while.

Poor Old Aberhart suggests that his disillusioned (and in many cases starving) followers should wear a look of contentment and happiness. Just let him try it—throw away his wealth and submit himself to those charitably inclined to keep him from starvation's door, and then smile.

Coleman horseshoe pitchers have formed themselves into a club to be known as the Coleman Ringers. The officers are: Wm. Bell, honorary president; Robert Gillies, president; Edward Woods, secretary-treasurer; A. Dewar, A. Hadfield and James Anderson, executive. The club has a membership of sixty.

A local guy went up the Elk a few days ago, having been told that with "blue upright" flies in his possession he would be assured of a good basket of fish. He came back somewhat disappointed. He had been heavily armed with two pockets filled with the recommended flies, and could not understand such poor results. Upon investigation, it was found that he carried neither rod, line or cast, and the hooks are still face value.

A. S. May is a visitor to Lethbridge this week end.

Rev. E. B. Arrol spent the week visiting in Calgary and Edmonton.

Rev. A. E. Larke, of Macleod, was a visitor here for two days this week.

Mr. I. Comfort has returned from Calgary, considerably improved in health.

W. A. Vaughn, of Western Grocers, is a business visitor to Cranbrook and Kimberley today.

Mr. and Mrs. Bob Mills, son and daughter, left this week for their new home at Creston.

Mr. and Mrs. George Moffat and daughter returned last week end from a holiday visit to the Pacific coast.

The Columbus Club Cardinals will stage a dance in the Columbus hall on the night of Friday, September 16.

Jimmy Murphy and Yvonne Howe returned last week end from a holiday spent at the Pelletier farm east of Pincher Creek.

Thomas Hughes, well known farmer of the Mountain Mill district, was honor guest of a local dentist on Thursday morning.

The Enterprise front windows are so crowded with displays of printed notices of big things that we cannot accommodate any more, and may yet be obliged to rent the windows of adjoining premises to give display to The Printed Word.

Everything points to the 1938 Bellevue flower show as the biggest and best yet. Bellevue gardens today are a picture worth travelling many miles to see. Should the weather be favorable on Monday, it is expected the attendance will be a record breaker.

We understand that at the next Castle River Club stampee, the wild cow milking contest is to be confined to city sheiks, leading merchants and professional men.

A Clareholm man has decided to fast until Aberhart hands him a dividend.

Mrs. D. N. Drain, former resident of Blairmore, now resident at Los Angeles, had the misfortune a short while ago of tripping and breaking an ankle.
